Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

As currently depicted the upstream limit of anadromous fish distribution goes too far upstream. A foot survey on May 12, 1987 found a ten foot high dam blocking fish passage. Electro-fishing above the dam captured two resident Dolly Varden. Recommend the atlas be change as shown on attached map

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) C. Wayne Dolezal

Date: 11/4/87 Signature: C. Wayne Dolezal

Address: 333 Raspberry Road
Anchorage Alaska 99518

Signature of Area Biologist:
