STREAM SURVEY FORM

Stream: CANIRCO DRAIN (ATTU) Date: 7-7-88 Biologist: TOBIN

Water Temp: 10°C

pH: 6.95

Conductivity: 71 @ °C 21

Alkalinity: 11

Hardness: 22

Birds Present: SONG SPARROW, SNOW BUNTING, GREEN-WINGED TEAL, LAPLAND LONGSPUR, GLAUCUS-WINGED GULL

Mammals Present: FOX TRACKS

Aquatic Veg: PRESENT

No. Anglers: — at time: —

Water Level: NORMAL Water Color: CLEAR/BROWNISH Flow (c.f.s.): 60±

Observations: This is the most productive looking stream surveyed thus far. It is a very short stream which has two very large lakes connected with it. The lower lake (LAKE CANIRCO) is roughly 0.2 mi. from where the stream empties into Chicago Harbor. The other lake (Lake Cories) is roughly 0.4 mi. above Lake Canirco. From Lake Cories down, the stream flows over a boulder/cobble bottom. There is a one meter falls in the stream between the two lakes. Five adult sockeye were spotted below Lake Canirco. SAW DOLLY JUV.
