Species	Date(s) Observed	Spawning	Rearing	Migration
Coho	6/21/90		XXX	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Double Funnel, wire minnow trap with 1/4" mess was fished for 1 hour 25 minutes. Trap baited with cured salmon eggs. Captured 1 juvenile coho salmon 70 mm long (tip of snout to fork of tail). Observed 20 to 30 smaller Fry in pool where coho was caught, however, the Fry were so small they swam through the mess. Also observed 1 dead 3-Spine Stickleback. This coho capture moves upper limit in this stream upstream approximate 3/4 mile.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) C. Wayne Dolezal

Date: 9/5/90 Signature: C. Wayne Dolezal

Address: ADF&G - Habitat Division
