

Southern Southeast Inside Area – Proposed Amendment to the Southeast Alaska King Salmon Management Plan - Regulations

BY:
LARRY McQUARRIE
REF: RC 64

Abundance Index	Bag Limit		Nonresident Annual Limit	Two rods October 1 - March 31
	Resident	Nonresident		
2.1 and above	3	1 or 2 ^a	6	All Anglers
1.76 to 2.0	3	1 or 2 ^b	5 or 6	All Anglers
1.51 to 1.75	3	1 or 2 ^b	4 or 5	All Anglers
1.21 to 1.5	2	1	3	Resident Anglers
1.2 and below	1	1	2 ^d	Resident Anglers
1.1 and below	1	1	2 ^d	Resident Anglers
Less than 1.0 ^c	1	1	2 ^d	Resident Anglers

^aNonresident bag limit of 2 fish in May and June and one fish remainder of the year.

^bNonresident bag limit of 2 fish in May and one fish remainder of the year.

^cAdditional restrictions at abundance indexes below 1.0 may include reduced fishing times, 48 inch limit for nonresidents and no retention periods.

^dDefining Southern Southeast Alaska Inside waters:

Southern Boundary – Same as the southern boundary for Non-Pelagic Rockfish: A line due south of Cape Chacon then eastward along the Canadian boundary.

Northern Boundary – Across the top of Prince of Wales Island from Pt. Colpoys eastward to Pt. MacNamara on Zarembo Island, and from Pt Nesbitt on Zarembo Island to Steamer Point on Etolin Island, and across the southern ends of Zimovia Passage and Eastern Passage.
