RE: Proposal #210 – Intent language based on the committee discussion.

Add a new section in 5 AAC 33.331. **GILLNET SPECIFICATIONS AND OPERATION.**

**(k) Notwithstanding 5 AAC 39.250(c), in the Southeast Alaska area, after January 1, 2016, a person may use single filament mesh web in a drift gillnet, from the last Sunday in July through the first Saturday in September with a maximum gillnet mesh size of four and seven eights inch. A permit holder must register with an Alaska Department of Fish and Game area management office as per established by the department if any part of their net contains single filament mesh. The provisions of this section do not apply after December 31, 2017.**
