

Figure 1. Genetic stock composition of Chinook salmon in the Northern District Commercial fisheries, 2014-2016. From Oral Report “Genetic Stock Composition of Chinook Salmon Harvested in the Northern Cook Inlet Marine Commercial and Subsistence Fisheries, 2014-2016” RC 4, Tab 9, Upper Cook Inlet Finfish meeting February 23-March 8, 2017. Bold red areas indicate commercial setnet fisheries. The Tyonek subsistence fishing area falls within the boundaries of the commercial setnet fishery and is noted by the bracket on this map.
