Uncataloged stream
102-30-44
(#10 in notes)
Moira Sound - South Arm
10-17-73
Novak & Downey

Very little or no fishery potential. A small stream located 100 yards south of stream 102-30-45. Falls are located at the tree line that stop all fish migrations. The average width is only 2'.

Optimum escapement- No spawning potential.

STREAM INVENTORY FORM

Name: Sick Creek

Number: 102-30-43

Observers: Novak, Larson

Date: 9-9-74

Temperature: 61°

Weather: Overcast

Station No.	1															
Pool Size/Type	2/1															
Riffle Type Width-Depth	63'W 11"D															
Pool Riffle Frequency	3															
Bottom Type (Riffle)	4															
Color/Turbidity	1/1															
Velocity	2															
Flow (C.F.S.)	470.88															
Temp. (°F.)	59°															
pH	6															
Fry Abundance	1-8															
Benthos Sample No.																
Higher Plant Class	1															
Aquatic Veg. Density Ident. (1) Mosses (2) Algae	3 / 2															

General Remarks (rehab., land use, barriers, log jams, etc.): No rehab. projects necessary as the stream is relatively free of windfall and the barriers present are not practical for laddering or alteration. These two barriers are located between the lower lake and the I.T.Z.
