

**Recommendation language for the Subsistence portion of Proposals 11,12,13.**

**5 AAC 06.361 (e)(3)**

**(3)** [shall] **may** establish, by emergency order, fishing periods during which the time or area is reduced for the inriver king salmon subsistence fishery in the Nushagak River.

- This language has been working for many years in the current Nushagak-Mulchatna King Salmon Management Plan. It still allows for E.O. authority, and mimics language found in regulation under 5AAC 01.010 (c).
- This language is important to retain in order to recognize the customary and traditional use and reliance on King Salmon specifically.
