Pertinent Wildlife Information:
Fresh Wolf Scat on road near tributary

Comments: Stream drys up 150' above the road. However, there was a good stream bed above this that would have water at slightly higher water levels. Because it appeared this would be good habitat if water were present we flagged it with orange & white striped tape for 150'
Recommend: Fish passage at road crossing (culvert has been removed) Directional falling & yarding, and usual cleanup from 150' above road to Chuck Creek.
