Lake Survey Form

Lake Notch Mountain (unofficial) Ktn. Sec. ____, Twp. ____, Rge. ____, Lat 55° 16.2' N., Long. 131° 13.8' W.

Acreage Approx. 100 83.2 USGS B-4 Max. Depth Approx. 25 ft. + Altitude 1050 ft.

Location Notch Moun. S.E. side above Thorne Arm Water Color (clear, silty) Brown

Type of Bottom Rock and muck

Inlets (name, size, permanency) 2, small in the heads of the two arms of the lake.

Benchmark (Description) None

Outlet (size, immediate and main drainage) est. 1 C.F.S. normal into Pot Cover Cove.

Barriers Small stream and steep pitches over bedrock impassable to ascending fish.

Use (Private, public, semiprivate) Some hunting from the lake, deer.

Public Access Site None

Facilities (Campground, roadhouse, etc.) None

Native Fish Species None 52 hours, 2 gillnet set, 2 rainbow. RES 7/12/65

Introduced Species None, 10,000 rainbow fry 7/25/61, ADF+G

Spawning Grounds Some in outlet and off the inlet streams, adequate for a climax population of trout.

Fishing History None.

Other Uses None known; deer hunting.

Fish Losses None

Character and size of watershed Scrub timber and muskeg, steep and about 55.8 acres of it. USGS Ktn. C-4, B-4.

Remarks This lake should produce some rainbow trout, is close enough to Ktn. that there will be some pressure on it by boat and plane parties. Rainbow taken in gillnets, 1965.

(over)

Description of accessibility (how reached) Lake presently reached by climbing through the brush from Thorne Arm for almost a mile or by plane when the wind is from the Southeast or calm.

Sketch: showing outline of lake, depth, prominent landmarks, inlets, outlet, weedbeds, public service site location, benchmark location, etc.
