JUSTIFICATION: Southeast Alaska wild king salmon stocks continue to be in a period of low productivity. Southeast Alaska king salmon escapements observed from 2016 to 2023 included levels below the lower bounds of escapement goals for many of the eleven monitored king salmon indicator systems and the trend of low production is expected to continue in 2024. During the 2022 Southeast Alaska finfish and shellfish Board of Fisheries meeting, the Northern Southeast Alaska (which includes the Chilkat, Taku and King Salmon Rivers), Stikine River and Andrew Creek, and Unuk and Chickamin Rivers king salmon action plans were adopted. These action plans outline conservative management measures for all fisheries to reduce the harvest of Southeast Alaska wild stock and transboundary river king salmon. This emergency order implements the conservative management measures outlined in the king salmon action plans for the sport fishery.

PREVIOUS EMERGENCY ORDERS AFFECTED: Emergency Orders 1-KS-C-03-24 and 1-KS-E-07-24 which established sport fishing regulations for king salmon in areas where Alaska hatchery-produced king salmon will be returning near Juneau and Petersburg, are unaffected by this emergency order.

Emergency Order 1-KS-R-08-24 established the regional bag, possession and annual limits for the Southeast Alaska king salmon sport fishery for the 2024 season and remain unaffected outside of the conservation measures specified by this emergency order.

DISTRIBUTION: The distribution list for this emergency order is on file at the Region 1 Office of the Alaska Department of Fish and Game, Division of Sport Fish, P. O. Box 110024, Douglas, AK 99811, (907) 772-5231.
