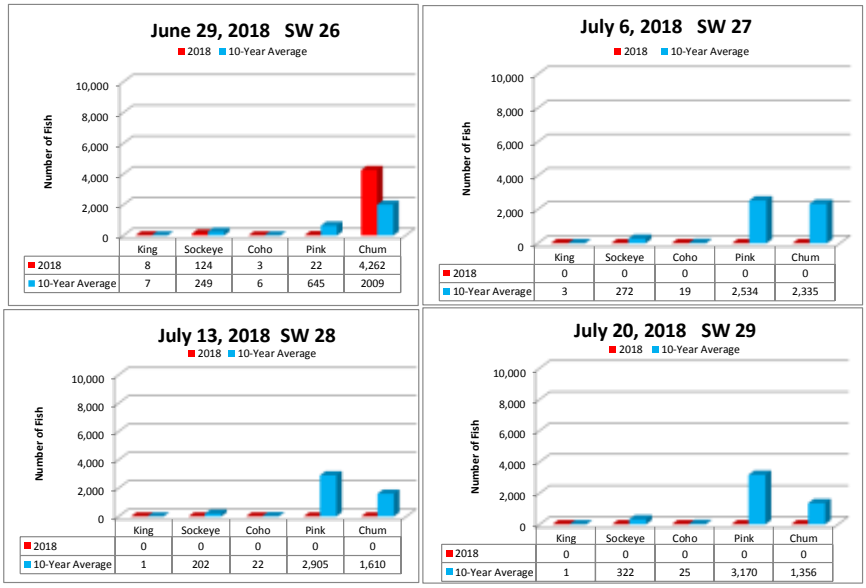
2018 HAWK INLET TEST FISHERY UPDATE # 1

The department conducted the first of the 2018 Hawk Inlet shoreline test fisheries yesterday. Comparing the total harvests for the day to the ten-year average total harvests, sockeye, coho and pink salmon were below average, and Chinook and chum salmon were above average. For the approximate date, the pink salmon harvest was 3% of the ten-year average and 27% of the recent even-year average. The sockeye salmon harvest was 50% the 10-year average and the chum salmon harvest was 212% of the 10-yr average.

The pink salmon sex ratio for the small sample was 77% male, above the average of 72% male for previous years test fisheries conducted on or about this date.



Hawk Inlet test fishery updates will be posted on the ADF&G web site listed below.
