JUSTIFICATION:

The Alaska Board of Game has authorized the Department of Fish and Game to extend the moose season by emergency order in the Lower Yukon Area of Unit 18. The season will be extended 10 days and open December 10 through February 28.

The moose population in this portion of Unit 18 was estimated at 3300 moose in 2008. Since then, other indicators such as composition and twinning rates suggest that this population is still experiencing rapid growth. Winter harvests in the past 5 years have fluctuated between 30 and 60 moose, with roughly 50% of those being cows and 50% bulls. Additional harvest at this time may help to slow the growth of this population while maintaining a high density and additional hunting opportunity.
