JUSTIFICATION:

Management biologists set a maximum harvest quota of five male goats or one female for the Red Bluff Bay Zone of the Unit 4 registration mountain goat hunt on Baranof Island (RG150). Quotas were calculated from 2017 survey results. The limit of one female was set to encourage harvest of males and has been a successful strategy, allowing hunters more opportunity and lowering the risk of localized overharvest. As of Monday, September 17, 2018, one female goat has been reported harvested. Because the maximum harvest quota has been met in this zone, an emergency order is being issued to close this zone to mountain goat hunting at 11:59 PM, Wednesday, September 19, 2018.

This emergency order is necessary to restrict the harvest to the maximum sustainable level and prevent overharvest in this zone. Any additional harvest could have long-term negative effects on this goat population.
