STATE OF ALASKA

PRESS RELEASE

For Immediate Release: September 6, 2019

### **State Closes Moose Hunt in Unit 22B West of Darby Mountains**

**(Nome)** – The Alaska Department of Fish and Game announces an emergency order to close the State resident moose season in hunt area Unit 22(B) West of the Darby Mountains covered under registration permit hunt RM840.

The State resident fall season for bull moose by registration permit hunt RM840 in Unit 22(B), that portion west of the Darby Mountains closes at 11:59 p.m. on September 6, 2019. *(Note: this area is identified as the Remainder of Unit 22(B) in codified regulations).* Harvest in western Unit 22(B) is expected to reach the fall harvest quota of 23 bulls by the season closing date in this announcement and no further harvest is warranted at this time. Hunters should note that seasons and harvest quotas in this hunt area are managed cooperatively with federal managers and a similar season closure for federal public lands may be announced by federal managers.

The moose population in western Unit 22(B) declined 15% annually between 1987 and 1992. Since that time the population has persisted at low densities with poor recruitment that averaged 11% 1992-2019. In order to prevent overharvest, the Alaska Board of Game established a moose registration permit hunt in western Unit 22(B). The fall harvest quota of 23 bulls is expected to be reached by the season closing date announced in this emergency order and no further harvest is warranted.

The department plans to administer hunt RM843 beginning January 1, 2020 with a quota that will be dependent on overall fall harvest.

The closure in Unit 22(B) West of the Darby Mountains is additive to the RM840 season closures previously announced for Unit 22(C), Unit 22(D) Southwest and Unit 22D in the Kuzitrin River drainage.

All other moose hunting regulations in Unit 22 remain unchanged by this emergency order.
