JUSTIFICATION:

Prior to the hunt, a quota of 23 bull moose that do not conform with the general season antler restrictions was established for the Copper Basin Community Subsistence Harvest Hunt (CM300) in Game Management Unit 13E. The quota in Unit 13E, based on sustainable harvest principles and current population estimates, has been reached.

Copper Basin community moose hunters may still hunt in subunit 13E through the end of the regularly scheduled season (September 20), however all bulls taken beginning Wednesday, August 31st, with a community harvest ticket must conform to the general hunt antler restrictions (spike-fork antlers or 50-inch antlers or antlers with four or more brow tines on one side).

The Board of Game allocated up to 100 moose that do not conform to general season antler restrictions to the Copper Basin Community Subsistence Harvest Hunt. The cumulative total for quotas for the 2022–23 season is 100 moose. The following table lists the quotas for each hunt area and the general season antler restrictions.

CM300 Quota of Bulls That Do Not Meet General Season Requirements	Hunt Area	General Season Antler Restriction for all other resident hunters
0	Open portion of GMU 12	Spike/fork, or 50" antlers, or 4 or more brow tines
0	GMU 13A West	Spike/fork, or 50" antlers, or 4 or more brow tines
5	GMU 13A East	Spike/fork, or 50" antlers, or 4 or more brow tines
30	GMU 13B	Spike/fork, or 50" antlers, or 4 or more brow tines
7	GMU 13C	Spike/fork, or 50" antlers, or 4 or more brow tines
33	GMU 13D	Spike/fork, or 50" antlers, or 4 or more brow tines
23	GMU 13E	Spike/fork, or 50" antlers, or 4 or more brow tines
2	GMU 11	Spike/fork, or 50" antlers, or 3 or more brow tines

This emergency order changes only the bag limit in Unit 13E. All other state hunting regulations still apply, including the closure of the take of all big game in the Paxson Closed Area.
