

RC 107

NAR/KVI

Amendment to Proposal 1

- 5 **AAC XX.XXX. Fishing seasons and periods.** In the existing subsistence salmon fishing area in the Naknek River.

(?) Subsistence fishing in the Naknek River will be allowed seven (7) days a week.

Issue: This would align subsistence fishing in the Naknek River with that of the Kvichak River. The department has not had a problem with escapement in the Naknek River. Subsistence fishing takes place on the lower portion (first six miles from the mouth) of the Naknek River and does not interfere with sport fishing, which generally takes place from Paul's Creek east (up river).
