Proposal # 344 – List *Paralithodes brevipes* as a king crab species in Alaska.

The following three pictures are to provide documentation of subsistence catches of *Paralithodes brevipes* from St Lawrence Island. These pictures are intended as additional background information provided by the ADF&G for proposal 344 in RC 2 and in RC 3 Norton Sound Section Shellfish, 2013; A Report to the Alaska Board of Fisheries.

Figure 1: Female *Paralithodes brevipes* (Hanasaki or spiny king crab) caught on St Lawrence in the summer of 2012

RC-

Figure 2: *Paralithodes brevipes* (Hanasaki or spiny king crab) caught on St Lawrence in 2013. Size indicated with tape measure.

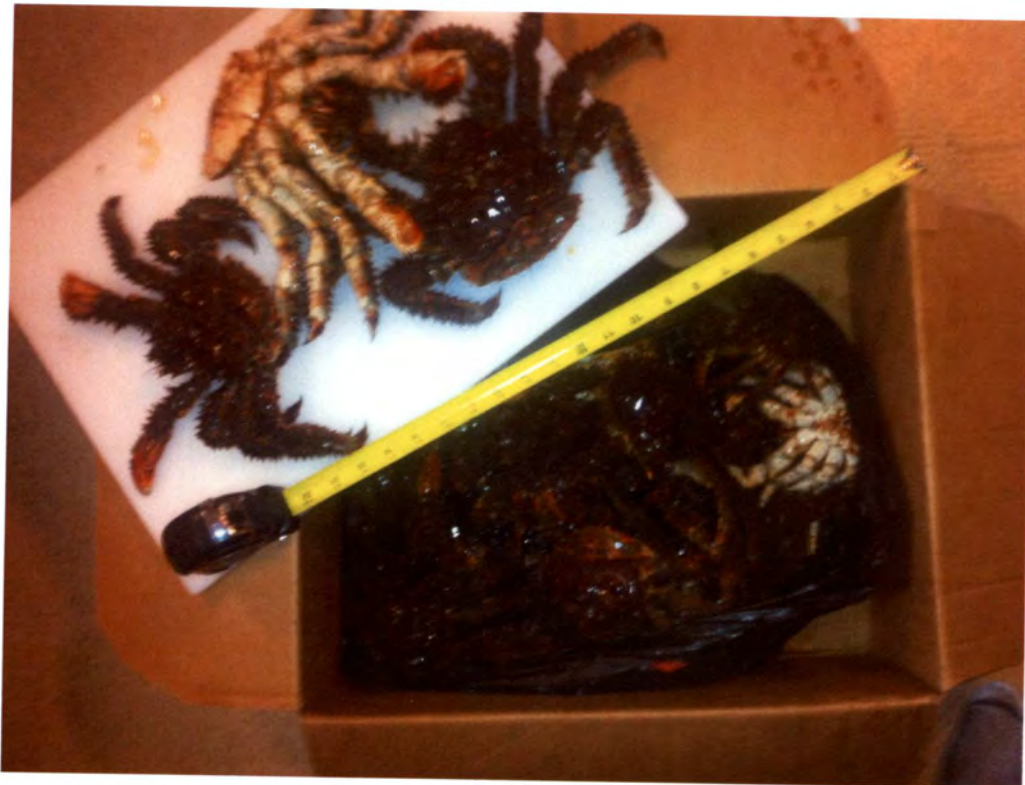

Figure 3: *Paralithodes brevipes* (Hanasaki or spiny king crab) caught on St Lawrence in 2013. Box with several crabs.
