Substitute language for Proposal 271

5 AAC 07.365(d)(2)(A) is amended to read:

5 AAC 07.365. Kuskokwim River Salmon Management Plan. (d)(2)

(A) the gillnet mesh size may not exceed four inches and a gillnet may only be operated as a set gillnet; no part of which may be more than 100 feet from ordinary high water mark until sockeye and chum abundance exceeds the king salmon abundance;
