RE: Southeast Alaska King Salmon Management Plan Task Force

Dear Chairman Morisky and Board members:

Territorial Sportsmen, Inc. (TSI) is a Juneau-based sportsman's organization created in 1945, and has a current membership of about 1,500. TSI is aware of interest within at least one organization to create or reconvene a Southeast Alaska King Salmon Management Plan Task Force (SEAKSMPTF). Representatives from TSI participated in a past SEAKSMPTF and understand the value as well as the time and financial costs associated with convening such a task force.

TSI is satisfied with the current directives and guidelines established in the existing king salmon management plan for SE Alaska and therefore sees no reason to invest time and money in a task force at this time. That said, if the Board ultimately decides to convene a task force, TSI would greatly appreciate being represented on it.

Please let me know if you have questions about TSI's current position regarding the formation of a SEAKSMPTF.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Larsen".

Doug Larsen
President, Territorial Sportsmen, Inc.
