

Findings for the Alaska Board of Game
2015-XXX-BOG
Board Recommendation to the Department of Fish and Game
provided during the Central/Southwest Region Meeting
March 17, 2015

The Board of Game finds as follows, based on information provided by Department staff, Alaska residents and other wildlife users:

The Board recommended the department take the following actions:

1. Establish individual quotas for each sub area of the Copper Basin community subsistence hunt for the moose that do not meet general season antler requirements in Units 11 and 13 and attempt to achieve the quota for each subarea regardless of whether or not the total harvest exceeds the total allocation for the CSH program.
2. As a permit condition, require hunters to report within 24 hours of harvesting a moose in the Copper Basin community subsistence hunt.
3. Keep the Copper Basin community subsistence caribou hunt open for the entire season or until the Copper Basin community subsistence caribou quota has been met, whichever occurs first.

Board Recommendation to the Department of Fish and Game

provided during the Central/Southwest Region Meeting

March 17, 2015

The Board of Game finds as follows, based on information provided by Department staff, Alaska residents and other wildlife users:

The Board recommended the department take the following action:

Include the requirement for all hunters to wear blaze orange outerwear (vest or jacket, not just a cap) while participating in the youth hunt for small game in the Hatcher's Pass Youth Hunt Management Area in Unit 14A. This requirement should be conveyed to the public in writing in the Alaska Hunting Regulations book produced annually by the department. The requirement should be found, at minimum, in the description of the management area on the Unit 14 map.

Board Recommendation to the Department of Fish and Game

provided during the Southcentral Region Meeting

March 17, 2015

The Board of Game finds as follows, based on information provided by Department staff, Alaska residents and other wildlife users:

The Board recommended the department take the following management action:

Establish a maximum human-caused mortality quota of no more than 50-60 brown bears, with no more than 8-12 of these adult (at least 5 years old) sows, per calendar year beginning after January 1, 2016, for Units 7 and 15.
