

Suggested Amendments from the Noatak and Kivalina Advisory Committee on proposals 44 & 45

Proposal 44: Modify the area of the Noatak Controlled Use Area in Unit 23

The Noatak and Kivalina AC would like to offer a possible compromise to their request to extend the length of the Controlled Use area. They would be willing to cut the lower extent of the CUA from the Mouth of the Noatak to the Agashashok River, and add that amount of length of CUA along with Noatak from Sapun Creek to the Cutler River. So that it would lengthen the upriver boundary of the CUA towards the Cutler and reduce user conflict in the upper reaches of CUA where the majority of the conflict currently exists.

Proposal 45:

Please refer to the minutes on AC 17, the refer to amendments that the Noatak and Kivalina AC wishes to have addressed. They would like to have hunters only on one side of the river; of the Squirrel, Eli and Agashashok Rivers. If possible have camps be located on the southern side of these rivers, if a specific side needs to be assigned.
