JUSTIFICATION:

A guideline harvest objective of 1-2 points (male goats=1 point, female goats=2 points) was established by ADF&G for the area described above. As of Friday, October 4, 2013 one male goat had been harvested for a total of 1 point. Due to the vulnerability of goats in this area to overharvesting the department conducted an aerial survey on September 24, 2013 that resulted in few goats observed (21 adults, 4 kids). Due to the low number of goats observed, the decision was made to limit the harvest to just 1 point in this area. Because the guideline harvest level has been reached and any additional harvest may be detrimental to the sustainability of this population of goats, an emergency order has been issued to close the mountain goat hunting season in this area.
