Doug Vincent-Lang  
Commissioner

By delegation to: \_\_\_\_\_  
Stephen Bethune  
Sitka Area Wildlife Management Biologist

**JUSTIFICATION:**

Hunt managers set a harvest quota of 2 males or 1 female for the Bear Mountain hunt zone of mountain goat hunt RG150 on Baranof Island. Quotas are based on the most recent aerial surveys. Baranof Island hunt zones were developed in 2017. The strategy of closing hunt zones when one female has been harvested has been very effective in reducing female harvest and has helped maintain high harvest opportunities for male goats. Keeping hunters focused on avoiding female harvest maintains opportunities for more hunters to participate, especially in hunt zones that have good access.

To date, one male and one female goat have been harvested in the Bear Mountain zone of RG150. The management objective for this hunt zone has been met and no further harvest is warranted. Therefore, this zone is being closed by emergency order.
