

Hunting and Trapping Emergency Order

Under the Authority of AS 16.05.060

Alaska Department
of Fish and Game

Emergency Order No. 01-01-13

Issued at Sitka, Alaska
22 July, 2013

Effective Date: 24 July, 2013

Expiration Date: 30 June 2014
(unless superseded by subsequent
emergency order)

EXPLANATION:

This emergency order closes the resident and nonresident mountain goat hunting season in the following portions of hunt area RG150; (1) that portion including Blue Lake, Glacier Lake drainages, (2) that portion including Medvejie Lake, Bear Lake, Indigo Lake drainages, and drainages into the east side of Silver Bay between Bear Cove and Mani point, and (3) that portion of the south Katlian River drainage including all drainages into the south side of Katlian Bay, including the drainage south of the south bank of the Katlian River, and that portion south of the south bank of the main stem stream draining into and out of Hogan Lake on Baranof Island in Game Management Unit 4. This emergency order takes effect at 11:59 PM, July 24, 2013.

REGULATION:

Therefore, the provisions of **5 AAC 85.040, Hunting seasons and bag limits for goat**, are superseded by this emergency order, and the following provisions are effective:

Units and Bag Limits	Resident Open Season (Subsistence and General Hunts	Nonresident Open Season
(1) ... Unit 4, that portion including Blue Lake and Glacier Lake drainages, (2) that portion Including Medvejie Lake, Bear Lake, and Indigo Lake drainages, and drainages into the east side of Silver Bay between Bear Cove and Mani point, and (3) that portion of the south Katlian River drainage including	No open season (General hunt only)	No open season

all drainages into the south side of Katlian Bay, including the drainage south of the south bank of the Katlian River; and that portion south of the south bank of the main stem stream draining into and out of Hogan Lake on Baranof Island.

1 goat by registration permit only; the taking of nannies with kids is prohibited.

...

All other mountain goat hunting regulations in Unit 4 remain unchanged and are not affected by this emergency order.

Cora Campbell
Commissioner

By delegation to: 
Philip W. Mooney
Sitka Area Wildlife Management Biologist

JUSTIFICATION:

Based on aerial survey data during 2006-2012, biologists have documented a sustained mountain goat population decline in the geographical areas defined in this emergency order. A series of severe winters and high harvest of female goats by hunters have lowered the productivity of this goat population. Nearly 66% of the goat population occurs on the northern half of Baranof Island and the core area within it (approximately 25% of that area) produces more than 60% of the goat harvest. This localized harvest intensity, especially on female goats, led to the biological concerns we now face.

Biologists have documented an increasing age structure of harvested female goats over time, which suggests that younger females are not as available as in the past. These concerns are further exacerbated with recent research data from collared goats near Sitka that reveals high fidelity by goats to small home ranges which would compromise a depleted population from rebounding quickly. This series of factors has led biologists to believe closing the goat season in these areas to be a necessary action to prevent further harvest and to allow this goat population to recover.

The emergency order action is necessary to restore the depleted goat populations in these areas. Any mortality through hunting is unwarranted and could be detrimental to the long term health and recovery of these goat populations.

DISTRIBUTION:

The distribution of this emergency order is to the attached listing. Copies are available from the Department of Fish and Game offices in Juneau, Douglas, Petersburg, Ketchikan, Wrangell, Sitka, Yakutat, Haines, Anchorage, Nome and Fairbanks.
