

ALASKA BOARD OF FISHERIES
85-109-FB

Findings on Proposal #91
March 1985

The Alaska board of Fisheries changed the boundary between the Pribilof and Southeastern tanner crab districts in the Bering Sea from 58° 39' N latitude to 58° N latitude based on the following considerations:

- (1) The existing federal line is 58° N latitude
- (2) The line is not used for biological separation of tanner crab stocks
- (3) 58° 39' N latitude is retained to separate biologically discrete king crab stocks, and any changes in the future in the king crab line will be based on biological findings relating to king crab stocks.

Ron Jolin, Chairman
Alaska Board of Fisheries

Adopted March 21, 1985
Anchorage, Alaska
