January 2013

The Fishery Management Reports series was established in 1989 by the Division of Sport Fish for the publication of an overview of management activities and goals in a specific geographic area, and became a joint divisional series in 2004 with the Division of Commercial Fisheries. Fishery Management Reports are intended for fishery and other technical professionals, as well as lay persons. Fishery Management Reports are available through the Alaska State Library and on the Internet: <http://www.adfg.alaska.gov/sf/publications/>. This publication has undergone regional peer review.

ABSTRACT

This document provides an overview of the South Alaska Peninsula state-waters Pacific cod season and summarizes regulations governing the weather delay, gear specifications, rollover provisions, vessel size and registration requirements, legal gear, pot storage, landing requirements, and bycatch provisions. The 2013 South Alaska Peninsula Area state-waters Pacific cod *Gadus macrocephalus* season for pot gear is scheduled to open seven days after closure of the Western Gulf of Alaska (WGOA) federal/parallel Pacific cod pot sector A-season or March 7, whichever is later. The 2013 South Alaska Peninsula Area state-waters Pacific cod season for jig gear is scheduled to open 48 hours after closure of the WGOA federal/parallel Pacific cod jig gear sector A-season; however, if the WGOA jig gear sector has not closed by March 15 the state-waters jig gear season may open pending assessment of federal jig effort, harvest rate, and remaining federal quota. Vessels participating in the state-waters Pacific cod season may not exceed 58 feet in length, and legal gear is limited to pot and jig gear. No more than 60 pots or five mechanical jigging machines may be operated from a vessel. The 2013 South Alaska Peninsula Area state-waters season Pacific cod guideline harvest level (GHL) is 15,586,682 pounds. Pot vessels are allocated 85 percent of the total GHL, or 13,248,680 pounds, and jig vessels are allocated 15 percent of the total GHL, or 2,338,002 pounds.

Key words: Pacific cod, *Gadus macrocephalus*, South Alaska Peninsula Area, regulations, guideline harvest level, state-waters season, parallel season

INTRODUCTION

AREA DESCRIPTION

The South Alaska Peninsula Area consists of all waters of Alaska in the Pacific Ocean between a line extending 135° southeast from Kupreanof Point (55°33.98' N lat, 159°35.88' W long) and 170° W long (Figures 1 and 2).

OVERVIEW

Two distinct Pacific cod *Gadus macrocephalus* fisheries occur within state waters (0–3 nmi) of the South Alaska Peninsula Area. The first fishery is prosecuted concurrent to the federal Western Gulf of Alaska (WGOA) Pacific cod fishery and is referred to as the parallel fishery. The parallel fishery is managed by adopting most National Marine Fisheries Service (NMFS) rules and inseason management actions. The second Pacific cod fishery is the South Alaska Peninsula Area state-waters fishery. The state-waters Pacific cod fishery is independent of the federal/parallel Pacific cod fishery and is managed exclusively by Alaska Department of Fish and Game (ADF&G) under guidelines developed by Alaska Board of Fisheries.

Parallel Season

When the federal (3–200 nmi) WGOA area is open to directed Pacific cod fishing, the State of Alaska opens a concurrent parallel Pacific cod season inside state waters (0–3 nmi). Unless specifically prohibited, the same gear types in the federal Pacific cod fishery are allowed in the parallel fishery, although non-pelagic trawl vessels are prohibited from fishing inside most state waters in the South Alaska Peninsula Area (5 AAC 39.164(b)(3) *Non-Pelagic Trawl Gear Restrictions*).

With the exception of vessels using jig gear, all vessels that participate in the parallel fishery must have an activated vessel monitoring system (5 AAC 28.087 (c)). All vessels targeting Pacific cod during the South Alaska Peninsula Area parallel fishery may not exceed 58 feet in overall length (5 AAC 28.577 (b)). Steller sea lion restrictions during the South Alaska Peninsula parallel fishery match federal management measures (5 AAC 28.087) with the exception of the haulout on Caton Island for vessels using pot and jig gear.

All vessel operators or agents must obtain a Westward Region parallel groundfish registration from ADF&G prior to fishing a parallel season. Vessel operators that fish exclusively in the South Alaska Peninsula parallel Pacific cod fishery are not required to possess a federal fishing permit (FFP) or Pacific cod gear endorsement administered through the federal License Limitation Program. Vessel operators that possess a FFP and participate in the parallel fishery are responsible for understanding federal regulations regarding observer coverage and logbook requirements.

Pacific cod harvested during the parallel and federal fisheries are deducted from the gear specific sector allocation. For additional information regarding federal Pacific cod fisheries contact NMFS (907-481-1780) or NMFS enforcement (907-486-3298). For additional information regarding parallel Pacific cod fisheries contact ADF&G in Kodiak (907-486-1840).

State-Waters Season

The South Alaska Peninsula Area state-waters Pacific cod fishery is an open access fishery and is prosecuted independent of the federal/parallel fishery. Specific information pertaining to the South Alaska Peninsula Area state-waters Pacific cod fishery is outlined below.

STATE-WATERS PACIFIC COD REGULATIONS

OVERVIEW

Regulations pertaining to the South Alaska Peninsula Area Pacific cod fisheries begin on page 58 of the 2012–2013 Statewide Commercial Groundfish Fishing Regulations booklet. ADF&G manages the South Alaska Peninsula Area state-waters Pacific cod season in accordance with the *South Alaska Peninsula Area Pacific Cod Management Plan* (5 AAC 28.577). Following is a summary of important regulations that govern the South Alaska Peninsula Area state-waters Pacific cod season.

2013 GUIDELINE HARVEST LEVEL

The guideline harvest level (GHL) for the state-waters Pacific cod season is based on 25 percent of the WGOA Acceptable Biological Catch (ABC) for Pacific cod. **The 2013 GHL for the South Alaska Peninsula Area state-waters Pacific cod fishery is 15,586,682 pounds.** By regulation, 85 percent of the total GHL (13,248,680 pounds) is allocated to pot vessels and 15 percent of the total GHL (2,338,002 pounds) is allocated to jig vessels.

SEASON DATES, WEATHER DELAY, AND ROLLOVER PROVISIONS

Pot Gear Season

The South Alaska Peninsula Area state-waters Pacific cod season for pot gear will open at noon March 7 or seven days after closure of the WGOA federal/parallel Pacific cod pot gear sector A-season, whichever is later. The state-waters season for pot gear will close when 85 percent of the total South Alaska Peninsula Area Pacific cod GHL has been harvested by pot vessels. If the state-waters pot gear GHL allocation has not been fully harvested by August 28, the state-waters pot gear season will close on August 28 to allow the WGOA federal/parallel Pacific cod pot gear sector B-season to open on September 1.

Jig Gear Season

The South Alaska Peninsula Area state-waters Pacific cod season for jig gear will open 48 hours after the WGOA federal/parallel jig gear sector A-season closes. However, if the federal/parallel jig sector has not closed by March 15, ADF&G may close the parallel (0–3 nmi) jig gear sector A-season and open the South Alaska Peninsula Area state-waters Pacific cod season for jig gear based on inseason assessment of federal jig effort and harvest rate, or remaining federal jig quota.

If the state-waters jig season opens prior to closure of the federal jig sector season, the South Alaska Peninsula state-waters jig season (0–3 nmi) will be prosecuted concurrent to the federal (3–200 nmi) WGOA jig sector Pacific cod season and Pacific cod harvested from state-waters will be deducted from the South Alaska Peninsula Area state-waters jig gear GHL allocation. Pacific cod harvested from federal waters will be deducted from the WGOA jig gear sector A-season harvest allocation.

When the South Alaska Peninsula Area state-waters and WGOA federal Pacific cod seasons are open concurrently for the same gear:

- Vessels may not simultaneously participate in a South Alaska Peninsula state-waters season and any other concurrent Pacific cod season.
- Vessels registered for a state-waters season must invalidate their ADF&G South Alaska Peninsula Area state-waters Pacific cod registration prior to participating in a federal Pacific cod season.
- Vessels participating in a federal Pacific cod season must register with ADF&G prior to participating in the South Alaska Peninsula Area state-waters Pacific cod season.
- All Pacific cod must be delivered prior to validating or invalidating a South Alaska Peninsula Area state-waters Pacific cod registration.
- Vessel operators may validate or invalidate vessel registrations by contacting ADF&G in Kodiak (907-486-1840) during normal state business hours (Monday–Friday, 8 AM to 5 PM).

The South Alaska Peninsula Area state-waters Pacific cod season for jig gear will close when 15 percent of the total South Alaska Peninsula Area Pacific cod GHL has been harvested by jig vessels. If the South Alaska Peninsula Area state-waters jig gear GHL allocation has not been fully harvested by June 8, the state-waters jig gear season may close on June 8 based on inseason assessment of jig effort, harvest rate, or remaining state-waters jig quota to allow the WGOA federal/parallel Pacific cod jig gear sector B-season to open on June 10. The state-waters season for jig gear will reopen after closure of the WGOA federal/parallel Pacific cod jig gear sector B-season if the South Alaska Peninsula Area state-waters jig gear GHL allocation has not been achieved.

Weather Delay

The state-waters season opening dates for pot and jig gear will be delayed 24 hours if the National Weather Service marine forecast for Area 155 (Castle Cape to Cape Sarichef) issued at 4:00 AM on the scheduled opening date contains gale warnings for that day and night plus the following day and night. If, after the initial weather delay, the following day's 4:00 AM National Weather Service marine forecast contains gale warnings for that day and night plus the following

day and night, the opening of the state-waters season will be delayed for an additional 24 hours. Weather delays may continue on a rolling 24-hour basis for seven days beyond the initial opening date. After seven days the season will open regardless of the weather forecast.

Rollover Provisions

Provisions in the South Alaska Peninsula Pacific cod management plan provide additional late season fishing opportunity during years when the GHL may not be fully harvested. If GHL is available for harvest at the time of the federal/parallel WGOA pot gear sector B-season closure, the state-waters Pacific cod season may reopen to both pot and jig gear. If a substantial portion of the state-waters season GHL remains unharvested on or after October 30, gear limits, vessel size restrictions, and exclusive registration requirements may be removed to facilitate full harvest of the GHL. All regulatory actions regarding late season rollover provisions will be announced by ADF&G news release.

VESSEL SIZE RESTRICTIONS AND REGISTRATION REQUIREMENTS

Pacific cod may not be taken by vessels greater than 58 feet in overall length during the South Alaska Peninsula Area state-waters Pacific cod season unless the vessel size restriction is removed by ADF&G and announced by news release on or after October 30.

All vessels—including tender vessels—must register with ADF&G prior to participating in the state-water season. Vessel registration for the federal/parallel fishery is not valid for the state-waters Pacific cod season; a separate state-waters Pacific cod registration is required.

The South Alaska Peninsula Area state-waters Pacific cod season is an exclusive registration area. Vessels registered for the 2013 South Alaska Peninsula Area state-waters Pacific cod season may not register for any other exclusive or superexclusive state-waters Pacific cod season during 2013. Conversely, if a vessel has registered for any other exclusive or superexclusive state-waters Pacific cod season outside of the South Alaska Peninsula Area during 2013, that vessel may not participate in the 2013 South Alaska Peninsula Area state-waters Pacific cod season. The South Alaska Peninsula exclusive vessel registration does not apply to federal/parallel Pacific cod fisheries.

Pacific cod registrations may be obtained in person or by fax at ADF&G offices in Kodiak and Dutch Harbor. Registrations may also be available at local processors in Sand Point and King Cove. Vessel operators must possess a 2013 Commercial Fisheries Entry Commission (CFEC) interim use miscellaneous finfish permit card for the appropriate gear type prior to registration. CFEC and other fishery related contact information is located in Appendix A1.

LEGAL GEAR, GEAR LIMITS, AND BUOY TAGS

Pot, mechanical jigging machine and hand troll gear are the only legal gear types during the state-waters Pacific cod season. Vessels may not use pot and jig gear at the same time. However, vessel operators may change gear registration by contacting the Kodiak ADF&G office (Appendix A1).

During the state-waters season, groundfish pots of any size may be used to take Pacific cod, although pot gear individual tunnel eye openings must be 36 inches in perimeter or less. All pots must be equipped with a biodegradable escape mechanism (5 AAC 39.145 *Escape Mechanism for Shellfish and Bottomfish Pots*). Pots must contain an opening 18 inches or greater in length placed within six inches of the bottom of the pot laced, sewn, or secured together by a single

length of untreated, 100 percent cotton twine no larger than 30 thread count. No more than 60 groundfish pots may be operated from a vessel, unless the pot limit has been rescinded by ADF&G news release on or after October 30.

Buoy tags are required for pot gear when the 60 pot limit is in effect. Tags must be placed on the main buoy or trailer buoy. **Buoy tags must be purchased for the 2013 season and will be available at ADF&G offices in Kodiak and Dutch Harbor for \$1.50 per tag.** Tags may be mailed through the U.S. Postal Service if paid for prior to shipment. Buoy tags may also be available in Sand Point and King Cove prior to the season opening date. A valid 2013 miscellaneous finfish CFEC permit card for pot gear is required to receive tags. Contact ADF&G in Kodiak at 907-486-1840 for additional information on buoy tags.

If buoy tags are lost during the season, replacement tags may be obtained by contacting ADF&G in Kodiak or Dutch Harbor. The vessel owner, operator, or agent must complete and submit an affidavit form to ADF&G describing how the tags were lost and the location and unique number(s) of each lost tag. Pots with lost tags may remain in the water but those pots must be secured open with bait and bait containers removed until replacement tags are obtained.

Vessels using mechanical jigging machines are restricted to using no more than five mechanical jigging machines unless the jig limit has been rescinded by ADF&G on or after October 30. Each of the five permissible lines may have no more than 30 hooks. Vessels may operate both hand troll and mechanical jigging gear at the same time; however, separate CFEC cards and fish tickets are required for each gear type at the time of landing.

BUOY MARKING REQUIREMENTS

Buoys attached to groundfish pots must be marked with the permanent ADF&G vessel number that corresponds with the ADF&G vessel number operating that gear as specified in 5 AAC 28.050 and 5 AAC 28.570(e). The buoy containing the five-digit ADF&G number may not be marked with any additional numbers; however, symbols and letters are acceptable on this buoy. Trailer buoys used to mark ownership or string sequence may be marked with any desired numbers, symbols, or letters.

POT STORAGE AND LANDING REQUIREMENTS

Following closure of a parallel or state-waters Pacific cod season, groundfish pots may be stored with all bait and bait containers removed and doors secured fully open on rectangular pots and doors not secured closed on pyramid and conical pots in waters at depth (greater than 25 fathoms) for a maximum of seven days following the closure date. After seven days following a closure, groundfish pots must be removed from the water or stored in waters 25 fathoms or less.

If the time period between closure of the WGOA federal/parallel Pacific cod pot gear sector A-season and the start of the South Alaska Peninsula Area state-waters pot gear season is more than seven days, all pot gear inside state-waters (0–3 nmi) must be placed into legal storage (25 fathoms or less). In this situation, gear may not be placed on the fishing grounds (greater than 25 fathoms) until the start of the South Alaska Peninsula state-waters Pacific cod season. Contact NMFS enforcement (Appendix A1) regarding gear storage in federal waters.

Landing requirements are specified in 5 AAC 28.581 on page 63 in the groundfish regulations booklet. With two exceptions, vessels participating in the state-waters Pacific cod season are required to deliver their catch within 48 hours after a closure. Vessels may have Pacific cod

onboard after the 48-hour period following a closure only when 1) the cod were harvested as allowable bycatch in another directed fishery, or 2) the vessel has been delayed due to extraordinary circumstances and the vessel operator has contacted an ADF&G representative within 48 hours following the closure and has been granted additional time to reach the port of landing.

BYCATCH

In state waters (0–3 nmi), ADF&G adopts NMFS maximum retainable bycatch percentages applicable in the Exclusive Economic Zone (EEZ; 3–200 nmi) for species that are not actively managed by the State of Alaska. Retainable bycatch percentages are subject to change and may differ between species. Unless otherwise specified, the maximum bycatch limit for any species of groundfish is 20 percent by weight of the targeted Pacific cod onboard a vessel. Notably, lingcod, dark rockfish, and octopus may be retained up to 20 percent by weight of retained Pacific cod and must be landed on the miscellaneous finfish card required to harvest Pacific cod. Black rockfish may be retained as bycatch up to 5 percent by weight of Pacific cod onboard a vessel. Vessels that are concurrently registered for the state-waters Pacific cod and the directed black rockfish fishery may retain black rockfish in excess of the 5 percent bycatch limit when the South Alaska Peninsula Area directed black rockfish fishery is open to commercial fishing. Updated retainable bycatch percentages can be found on the NMFS Alaska Region website: <http://www.fakr.noaa.gov/> or by contacting ADF&G in Kodiak (Appendix A1).

CONCURRENT GROUND FISH FISHERIES

Vessels may register to simultaneously participate in the South Alaska Peninsula Area state-waters Pacific cod season and the federally managed WGOA walleye pollock fishery in waters between 170° W long and Castle Cape (158°20' W long). Vessels actively participating in the South Alaska Peninsula state-waters Pacific cod fishery may leave baited pot gear on the fishing grounds while trawling for WGOA walleye pollock (5 AAC 28.556 (f)). However, those vessels must contact ADF&G staff in Kodiak prior to entering and exiting the WGOA walleye pollock fishery. Vessel operators are reminded that all state-waters Pacific cod delivery and gear storage requirements apply in the event the state-waters Pacific cod season closes while vessels are targeting walleye pollock. Vessels intending to participate in groundfish fisheries outside of waters between 170° W long and Castle Cape (158°20' W long) must first invalidate their South Alaska Peninsula Area state-waters Pacific cod registration and legally store all pot gear.

CATCH REPORTING

ADF&G will manage the South Alaska Peninsula Area state-waters Pacific cod pot season using inseason catch reports (Appendix B1) provided by vessel operators. By regulation, vessel operators using pot gear **must report daily** the harvest location, number of pot lifts, and pounds of Pacific cod retained in the previous 24-hour period. Inseason catch reports allow ADF&G to consider how changes in effort, fleet behavior, tides, and weather influence harvest rates. Catch reports will be taken by satellite dispatch service, phone, fax, or e-mail (trent.hartill@alaska.gov). **The Kodiak groundfish management office dispatch number is 7894.** Vessel operators will be asked for their preferred reporting method when registering and reporting worksheets will be issued at that time.

Reports will initially be taken at 9:00 AM daily. Reports should include the area fished, number of pot lifts, and pounds of cod retained for the previous 24-hour period (midnight to midnight).

INSEASON ANNOUNCEMENTS

All inseason fishery management actions in the state-waters season will be communicated to the fleet by dispatch, distributed via the ADF&G news release email subscription service (<http://www.adfg.alaska.gov/index.cfm?adfg=cfnews.main>), placed on the ADF&G recorded information phone (907-486-4559), and relayed through participating processors. ADF&G will make every effort to provide sufficient time for permit holders to configure gear for storage or place gear onboard before a closure; however, the potential exists for a short advance notice closure.

Weekly harvest updates will be released each Monday after 4:00 PM while the state-waters season is open. Weekly harvest updates are available on the ADF&G website at: <http://www.adfg.alaska.gov/index.cfm?adfg=CommercialByAreaKodiak.groundfish#/harvest> or from the ADF&G groundfish management office in Kodiak.
