Symbols and Abbreviations

The following symbols and abbreviations, and others approved for the Système International d'Unités (SI), are used in Division of Sport Fish Fishery Manuscripts, Fishery Data Series Reports, Fishery Management Reports, and Special Publications without definition. All others must be defined in the text at first mention, as well as in the titles or footnotes of tables and in figures or figure captions.

Weights and measures (metric)		General		Mathematics, statistics, fisheries
centimeter	cm	All commonly accepted abbreviations.	e.g., Mr., Mrs., a.m., p.m., etc.	alternate hypothesis H_A
deciliter	dL			base of natural logarithm e
gram	g	All commonly accepted professional titles.	e.g., Dr., Ph.D., R.N., etc.	catch per unit effort CPUE
hectare	ha			coefficient of variation CV
kilogram	kg			common test statistics F, t, χ^2 , etc.
kilometer	km	and	&	confidence interval C.I.
liter	L	at	@	correlation coefficient R (multiple)
meter	m	Compass directions:		correlation coefficient r (simple)
metric ton	mt	east E		covariance cov
milliliter	ml	north N		degree (angular or temperature) $^\circ$
millimeter	mm	south S		degrees of freedom df
		west W		divided by \div or / (in equations)
Weights and measures (English)		Copyright ©		equals =
cubic feet per second	ft ³ /s	Corporate suffixes:		expected value E
foot	ft	Company Co.		fork length FL
gallon	gal	Corporation Corp.		greater than >
inch	in	Incorporated Inc.		greater than or equal to \geq
mile	mi	Limited Ltd.		harvest per unit effort HPUE
ounce	oz	et alii (and other people)	etc.	less than <
pound	lb	et cetera (and so forth)		less than or equal to \leq
quart	qt	exempli gratia (for example)	e.g.,	logarithm (natural) ln
yard	yd	id est (that is)	i.e.,	logarithm (base 10) log
Spell out acre and ton.		latitude or longitude	lat. or long.	logarithm (specify base) \log_2 , etc.
Time and temperature		monetary symbols (\$, ¢ U.S.)		mideye-to-fork MEF
day	d	months (tables and figures): first three letters	Jan.,...,Dec	minute (angular) '
degrees Celsius	°C	number (before a number)	# (e.g., #10)	multiplied by x
degrees Fahrenheit	°F	pounds (after a number)	# (e.g., 10#)	not significant NS
hour (spell out for 24-hour clock)	h	registered trademark ®		null hypothesis H_0
minute	min	trademark ™		percent %
second	s	United States (adjective)	U.S.	probability P
Spell out year, month, and week.		United States of America (noun)	USA	probability of a type I error (rejection of the null hypothesis when true) α
Physics and chemistry		U.S. state and District of Columbia abbreviations	use two-letter abbreviations (e.g., AK, DC)	probability of a type II error (acceptance of the null hypothesis when false) β
all atomic symbols				second (angular) "
alternating current	AC			standard deviation SD
ampere	A			standard error SE
calorie	cal			standard length SL
direct current	DC			total length TL
hertz	Hz			variance Var
horsepower	hp			
hydrogen ion activity	pH			
parts per million	ppm			
parts per thousand	ppt, ‰			
volts	V			
watts	W			

FISHERY DATA SERIES NO. 98-25 (REVISED)

**REVISED EDITION
HARVEST, CATCH, AND PARTICIPATION IN ALASKA SPORT
FISHERIES DURING 1997**

June 2001

This investigation was partially financed by the Federal Aid in Sport Fish Restoration Act (16 U.S.C. 777-777K) under Project F-10-13, Job No. RT-1.

The Fishery Data Series was established in 1987 for the publication of technically-oriented results for a single project or group of closely related projects. Fishery Data Series reports are intended for fishery and other technical professionals. Fishery Data Series reports are available through the Alaska State Library and on the Internet: <http://www.sf.adfg.state.ak.us/statewide/divreports/html/intersearch.cfm> This publication has undergone editorial and peer review.

Howe, A. L., R. J. Walker, C. Olnes, K. Sundet, and A. E. Bingham. 2001. Revised Edition: Harvest, catch, and participation in Alaska sport fisheries during 1997. Alaska Department of Fish and Game, Fishery Data Series No. 98-25 (revised), Anchorage.

The Alaska Department of Fish and Game administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility, or if you desire further information please write to ADF&G, P.O. Box 25526, Juneau, AK 99802-5526; U.S. Fish and Wildlife Service, 4040 N. Fairfax Drive, Suite 300 Webb, Arlington, VA 22203 or O.E.O., U.S. Department of the Interior, Washington DC 20240.

For information on alternative formats for this and other department publications, please contact the department ADA Coordinator at (voice) 907-465-4120, (TDD) 907-465-3646, or (FAX) 907-465-2440.

PREFACE

Late in 1999 project staff determined that computer programs used to process data from this study and produce estimates for 1995 through 1997 contained errors. These errors altered some angler's reported catch and harvest. The errors did not affect all species or fishing locations in the same way; thus some estimates were too high, while others were too low. In addition, when generating estimates for angler-days fished and household trips the computer programs did not properly account for anglers who did not respond to the survey. This error resulted in estimated days-fished and household trips that were too high for 1995 through 1997.

The division's technical staff also determined during review of the effect of the above errors that the approach used to account for anglers who did not respond should also be adjusted to reflect the approach published in current scientific literature. This adjustment would affect some 1995-1997 estimates and some 1998 estimates.

The 1996 through 1998 estimates have been revised. We are unable to retrieve the raw 1995 data due to a faulty data tape and thus those estimates cannot be adjusted. Statewide and regional comparisons of original and revised estimates are included in the Discussion section of this report. The recomputed 1996 through 1998 estimates are also included in summary tables in this report. The more detailed recomputed estimates will be published in revised editions of Fishery Data Series Nos. 99-41, 98-25, and 97-29. Summaries of sport fish survey results, including revised 1996 through 1998 estimates, are available on the Internet at:

<http://www.sf.adfg.state.ak.us/statewide/participationandharvest/html/index.cfm>

The division has a commitment to producing the best information possible for making management decisions about Alaska's recreational fisheries and we strive to improve our studies each year. We regret that these errors occurred, have taken steps to avoid such problems in the future, and have committed resources to correct estimates where possible.

In light of the above, anyone who has used 1996 through 1998 estimates from the Statewide Harvest Survey project may wish to review the changes that have resulted from these recalculations.

The purpose of this report is to provide the revised 1997 estimates. The data processing, and estimation procedures used to produce revised 1996 through 1998 estimates are described in Howe, et al (2001).

ABSTRACT

Since 1977, the Alaska Department of Fish and Game has conducted an annual mail survey to estimate sport fishing participation and harvests (fish kept) statewide by Alaska fisheries, areas, regions, and species. Since 1990, catches (fish harvested plus fish released) have also been estimated. Detailed findings are presented for 1997. In 1997, an estimated 438,117 anglers fished 2,079,514 days and kept 2,873,020 of the 7,105,442 fish caught.

Key words: Alaska, recreation, sport, fish, fisheries, fishing, catch, harvest, angler, angler-days, survey, salmon, trout, char, Arctic grayling, northern pike, whitefish, burbot, smelt, Pacific halibut, rockfish, lingcod, razor clams.

INTRODUCTION

A statewide database providing information on where sport fishing occurs, the extent of participation, the preferences of participants, and the species and numbers of major game fishes being caught and harvested is essential for regulation and management of Alaska's sport fisheries and for total regulation, management, and allocation of multiple-use fisheries. In addition, this information is needed for establishing priorities; for formulating policies; for budgeting; for planning and evaluating rehabilitation, enhancement, stocking, habitat protection, and access acquisition projects; for stock assessment; for forecasting; for gauging the economic and social significance of sport fishing; and for satisfying requests for information from individuals, special interest groups, government agencies, and the recreational industry.

Because of Alaska's vastness, meeting all these information requirements statewide by onsite creel surveys would be prohibitively expensive, thus a supplementary program has been developed. Described herein are results from the twenty-first year of that program, whose primary objective is to provide statewide estimates of participation, catch, and harvest for major Alaskan sport-caught species by area and fishery.

Alaska sportfishing regulatory and management areas are delineated in Appendix A1 and Appendix A2. Species covered are listed in Appendix A3.

METHODS

The data collection methods were, of course, unchanged from those detailed in the original report for these estimates and are essentially the same as those described for the 1999 estimates (Howe, et al 2001). Howe, et al (2001) includes a description of the methods used to process data and produce revised estimates for 1996, 1997, and 1998.

RESULTS

A full text Adobe PDF file of this report, as well as summaries of other estimates produced by this long-term study, is available via the division's Internet site under the Publications section:

**[http://www.state.ak.us/local/akpages/
FISH.GAME/sportf/sf_home.htm](http://www.state.ak.us/local/akpages/FISH.GAME/sportf/sf_home.htm)**

The following Internet site also contains on-line summaries of sportfishing participation, catch, and harvest:

**[http://www.sf.adfg.state.ak.us/statewide/
participationandharvest/html/index.cfm](http://www.sf.adfg.state.ak.us/statewide/participationandharvest/html/index.cfm)**

PARTICIPATION

In 1997 an estimated 438,117 anglers fished 2,079,514 days (Appendix A7). About 50% of the anglers were Alaska residents who accounted for 63% of the total days fished. Nonresident participation in terms of anglers was highest in Southeast (67.4%) and lowest in the Arctic-Yukon-Kuskokwim (AYK) region (29.7%). In Southcentral 53.8% of all anglers were Alaska residents.

While Alaska resident days fished exceeded those of nonresidents in all regions of the state, the margin was slight in Southeast with resident anglers accounting for 50.5% of the regional total days fished. Resident anglers in Southcentral and AYK accounted for about 65.2% and 75.9% of total regional days fished, respectively (Appendix A7).

Between 1994 and 1997 total anglers declined slightly (Appendix A8) due to decreases in resident angler participation. Angler-days fished has also decreased between 1994 and 1997 (Appendix A12) with most of the decrease occurring in Southcentral between the years 1995 and 1996.

HARVEST

The 2,873,020 fish harvested in 1997 (Appendix A14), included 850,003 razor clams *Siliqua patula* and 77,491 smelt and capelin Osmeridae. Of the remaining 1,945,526 harvested fish, 1,091,558 (56%) were anadromous (sea-run) salmon *Oncorhynchus*.

The 1997 total anadromous salmon harvest of 1,945,526 included 185,175 chinook salmon, 444,525 coho salmon, 318,839 sockeye salmon, 111,671 pink salmon *Oncorhynchus gorbuscha*, and 31,348 chum salmon *Oncorhynchus keta* (Appendix A14). The marine sea-run salmon harvest totaled 523,725 (Appendix A15), while the freshwater harvest totaled 567,833 fish (Appendix A16).

Regionally, 337,607 anadromous salmon were harvested in Southeast Alaska (Appendix A17), 711,020 in Southcentral (Appendix A18), and 42,931 in the Arctic-Yukon-Kuskokwim area (Appendix A19). Other harvest estimates for 1997 are tabulated by region, area, fishery, and species in Appendix A.

CATCH

The catch of 7,105,442 fish in 1997 (Appendix A14) included 986,615 razor clams and 80,464 smelt. Of the remaining 6,038,363 fish caught, 2,523,521 (42%) were anadromous (sea-run) salmon *Oncorhynchus*. Anglers caught 939,895 rainbow trout *Oncorhynchus mykiss*, 604,930 Arctic grayling, 586,119 Dolly Varden *Salvelinus malma* and Arctic char *Salvelinus alpinus*, and 732,579 Pacific halibut *Hippoglossus stenolepis* (Appendix A14).

Other catch estimates for 1997 are tabulated by region, area, fishery, and species in Appendix A.

DISCUSSION

Statewide and regional comparisons of original and revised 1996-1998 and 1999 harvest estimates are presented by species in Tables 1-4. In some instances large percentage changes from the original are of minor significance because the original and revised estimates were imprecise or the absolute values of the estimates are small. For example, the 450% change from the original to revised estimate for 1996 steelhead harvest is tempered by the relatively small absolute value of that change of 337 fish (Table 1).

One of the more significant changes relates to revised estimates of angler-days fished. Prior to revision, it appeared the decline between 1996 and 1998 was around 579,000 days fished or 21% of the 1996 estimate. Revised estimates indicate an absolute change of about 149,000 days fished or about 7% of the revised 1996 estimate.

There is some concern that the 1998 estimates of days fished may be biased low. The 1999 estimate of days fished is about 642,000 (35%) higher than the revised 1998 estimate, despite only a slight decline in angler

estimates and only a minor increase in sport license sales of about 13,500 (Appendix A6). The Sport License file, from which the sample of sportfishing households is selected, was very incomplete when the 1998 sample was selected. Few August sales and a large proportion of July sales were not present on the file at the time of sampling. To help alleviate the impact of this problem on estimates, post-stratification scheme based on date of license sale was used when 1998 estimates were revised. A similar problem existed with the license file for the 1999 study, but a split-sample approach was used to deal with the problem up-front (see Methods). The 1999 split-sample approach was again used in 2000, because the section in charge of capturing license data had not substantially improved file completeness when needed for our study. Thus 2000 estimates may provide additional insight into the questions concerning 1998 estimates of angler-days fished.

Another significant revision in the estimates pertains to Pacific halibut in 1996 and 1997. While the change in statewide estimates was not dramatic (4-5%), correcting errors in processing data for Southeast fishing locations increased 1996-1997 regional estimates 28 and 26%, respectively. While the absolute differences are not appreciably large (around 22,000 fish annually) considering the magnitude of total halibut removal by all user groups, the allocation of Pacific halibut harvest to the sport charter sector has been a “hot” issue in recent years and thus any change could affect future allocations and thus have economic impacts.

The harvest estimates from the 1997 mail survey compared favorably with estimates from onsite creel surveys (Appendix A107). The onsite and mail survey estimates for the salmon fisheries of the Sitka marine boat and Juneau Marine boat were not significantly different. Onsite survey estimates for the Ketchikan marine boat salmon

were biased low because a major access point (Clover Pass) was not sampled (Hubartt, et al 1998). The Gastineau Hatchery Roadside creel survey estimate of coho salmon was significantly greater than the corresponding estimates from the annual mail survey, while estimates for other species did not significantly differ.

The individual post-stratified estimates of chinook salmon harvest for the Kenai River as reported in the comparison table (Appendix A107), were in 3 out of 4 instances significantly different. The discrepancy may relate to the breakdown of harvest into the early versus late portion of the fishery, as well as the guided and non-guided portions. Yet estimates of guided or nonguided angler harvest combined across periods are dissimilar: (1) 9,516 harvest estimate for the guided anglers from the onsite survey versus the corresponding estimate of 6,713 from the annual mail survey, and (2) 5,762 harvest estimate for the non-guided anglers from the onsite survey versus 4,531 from the annual mail survey. Combining estimates into early and late fisheries also resulted in dissimilar estimates: 4,942 early run for the onsite survey versus 3,805 for the mail survey; 10,336 late run for the onsite survey versus 7,439 for the mail survey.

We suppose that households responding to the mail survey may have had difficulty recalling exactly when and where their fishing trips occurred in the Kenai River. Of course, other unknown factors related to the onsite and mail surveys could have influenced estimates.

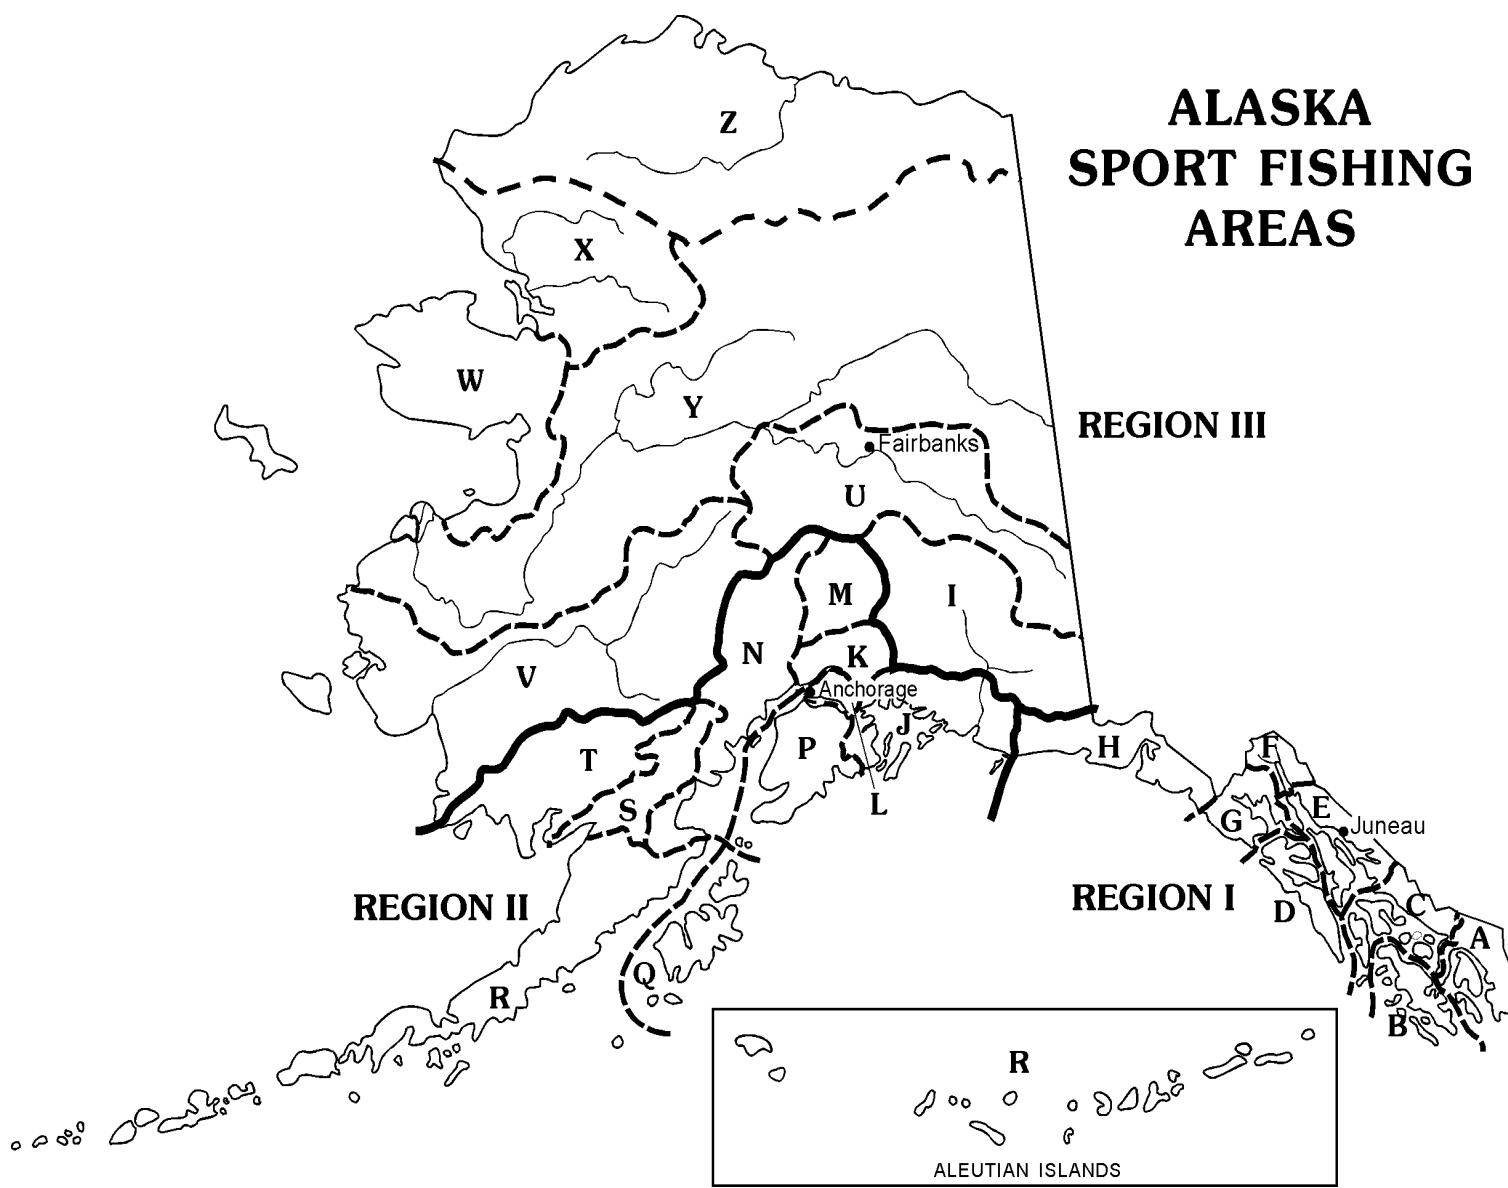

ACKNOWLEDGMENTS

We thank the many divisional staff who reviewed the revised estimates provided in this report.

APPENDIX A. TABLES AND FIGURES

Appendix A1.-Map of Alaska sport fishing regions and areas.

Appendix A2.-List of Alaska sport fishing regions and areas.

Regions

- I Southeast Alaska**
- II Southcentral Alaska**
- III Arctic-Yukon-Kuskokwim**

Areas

Southeast Alaska

- A Ketchikan**
- B Prince of Wales Island**
- C Kake, Petersburg, Wrangell, Stikine**
- D Sitka**
- E Juneau**
- F Haines-Skagway**
- G Glacier Bay**
- H Yakutat**

Southcentral Alaska

- J Prince William Sound**
- K Knik Arm Drainage**
- L Anchorage**
- M East Susitna River Drainage**
- N West Cook Inlet-West Susitna River Drainages**
- P Kenai Peninsula**
- Q Kodiak**
- R Naknek River Drainage-Alaska Peninsula**
- S Kvichak River Drainage**
- T Nushagak**

Arctic-Yukon-Kuskokwim

- I Upper Copper/Upper Susitna Drainages**
- U Tanana River Drainages**
- V Kuskokwim-Goodnews Drainages**
- W Seward Peninsula-Norton Sound Drainages**
- X Northwest Alaska Drainages**
- Y Yukon River Drainages**
- Z North Slope Brooks Range Drainages**

Appendix A3.-List of common names, scientific names, and abbreviations.

Common Name	Scientific Name	Abbreviation
Chinook salmon	<i>Oncorhynchus tshawytscha</i>	KS
Small chinook salmon	<i>Oncorhynchus tshawytscha</i>	KI
Coho salmon	<i>Oncorhynchus kisutch</i>	SS
Landlocked salmon - coho	<i>Oncorhynchus kisutch</i>	LL
Landlocked salmon - chinook	<i>Oncorhynchus tshawytscha</i>	LL
Sockeye salmon	<i>Oncorhynchus nerka</i>	RS
Kokanee salmon	<i>Oncorhynchus nerka</i>	KO
Pink salmon	<i>Oncorhynchus gorbuscha</i>	PS
Chum salmon	<i>Oncorhynchus keta</i>	CS
Steelhead	<i>Oncorhynchus mykiss</i>	SH
Rainbow trout	<i>Oncorhynchus mykiss</i>	RT
Cutthroat trout	<i>Oncorhynchus clarki</i>	CT
Brook trout	<i>Salvelinus fontinalis</i>	BT
Lake trout	<i>Salvelinus namaycush</i>	LT
Dolly Varden	<i>Salvelinus malma</i>	DV
Arctic char	<i>Salvelinus alpinus</i>	AC
Arctic grayling	<i>Thymallus arcticus</i>	GR
Northern pike	<i>Esox lucius</i>	NP
Whitefish	<i>Coregonus</i> spp. and <i>Prosopium</i> spp.	WF
Burbot	<i>Lota lota</i>	BB
Inconnu (Sheefish)	<i>Stenodus leucichthys</i>	SF
Pacific halibut	<i>Hippoglossus stenolepis</i>	HA
Shark	<i>Lamna ditropis</i> (salmon shark), <i>Somniosus pacificus</i> (Pacific sleeper shark), and <i>Squalus acanthias</i> (spiny dogfish) are the most common species caught.	SK
Rockfish	<i>Sebastes</i> spp.	RF
Lingcod	<i>Ophiodon elongatus</i>	LC
Smelt	<i>Osmeridae</i>	SM
Capelin	<i>Mallotus villosus</i>	SM
King crab	<i>Paralithodes camtschatica</i>	KC
Dungeness crab	<i>Cancer magister</i>	DC
Tanner crab	<i>Chionoecetes bairdi</i>	TC
Shrimp	<i>Pandalidae</i>	SHR
Razor clam	<i>Siliqua patula</i>	RCL
Hardshell clams		HCL
Butter clam	<i>Saxidomus giganteus</i>	
Littleneck clam	<i>Protothaca staminea</i>	
Cockle	<i>Clinocardium nuttallii</i>	
Gaper clam	<i>Tresus capax</i>	
Eastern softshell clam	<i>Mya arenaria</i>	
Truncated mya	<i>Mya truncata</i>	
Alaska surf clam	<i>Spisula polynyma</i>	
Other shellfish		OS

Appendix A4.-Response to the standard Alaska sport fish survey mailing, 1997.

	Mailing 1	Mailing 2	Mailing 3	Total
Mailing^a				
Number Mailed	22,000	15,546	12,635	50,181
Number Returned Nondeliverable ^b				1,176
Number not Returned ^b	15,546	12,635	11,143	39,324
Responses				
Number ^b	5,586	2,721	1,374	9,681
Percent of 1st Mailing not Returned as Nondeliverable				46.5%

^a Resident surveys were mailed 12/2/97, 1/13/98, and 2/20/98.

Nonresident surveys were mailed 12/19/97, 1/28/98, and 3/9/98.

^b Does not include returns after May 21, 1998. Because there is no proof of questionnaire delivery unless returned by the addressee, all nondeliverables are counted as nondeliverable to the first mailing.

Appendix A5.-Response to the supplementary Alaska sport fish survey mailing, 1997.

	Mailing 1	Mailing 2	Mailing 3	Total
Mailing^a				
Number Mailed	25,000	18,722	15,549	59,271
Number Returned Nondeliverable ^b				1,400
Number not Returned ^b	18,722	15,549	13,877	48,148
Responses				
Number ^b	5,220	2,955	1,548	9,723
Percent of 1st Mailing not Returned as Nondeliverable				41.2%

^a Resident surveys were mailed 11/21/97, 1/8/98, and 2/11/98.

Nonresident surveys were mailed 12/12/97, 1/21/98, and 3/4/98.

^b Does not include returns after May 21, 1998. Because there is no proof of questionnaire delivery unless returned by the addressee, all nondeliverables are counted as nondeliverable to the first mailing.

^a Statewide and regional angler totals do not equal regional or area sums because some anglers fished in more than one area and in more than one region.

^b Upper Copper/Upper Susitna Drainages estimates are included under the Arctic-Yukon-Kuskokwim Region starting in 1997 to reflect the shift in management responsibilities.

Appendix A11.-Number of Alaska sport fishing trips by region and area, 1987-1997.

^a East Susitna River Drainage (Area M): All drainages of the Susitna River below the Oshetna and above the Chulitna River. Includes the Oshetna River drainage. All east side drainages of both the Chulitna River and the Susitna River below its confluence with the Chulitna River, to and including Willow and Deception Creeks to the south. Fish taken from the east bank of the Chulitna and Susitna Rivers are included in this area. No saltwater fishing in this area.

^b Standard errors were calculated using the bootstrap method. Because the empirical distribution of derived confidence intervals for these estimates is not symmetrical, valid confidence intervals cannot be obtained directly.

^c Refer to Appendix A3 for common names and species abbreviations.

Appendix A77.-West Cook Inlet-West Susitna River Drainages^a sport fish harvest and effort by fisheries and species^b, 1997.
