Regional Information Report 5J99-02

Alaska Department of Fish and Game
Division of Commercial Fisheries
P.O. Box 25526
Juneau, AK 99802

March 1999

The Regional Information Report Series was established in 1987 to provide an information access system for all unpublished divisional reports. These reports frequently serve diverse ad hoc informational purposes or archive basic uninterpreted data. To accommodate timely reporting of recently collected information, reports in this series undergo only limited internal review and may contain preliminary data; this information may be subsequently finalized and published in the formal literature. Consequently, these reports should not be cited without prior approval of the author or the Commercial Fisheries Management and Development Division.

The Alaska Department of Fish and Game administers all programs and activities free from discrimination on the basis of race, religion, color, national origin, age, sex, marital status, pregnancy, parenthood, or disability. For information on alternative formats for this and other department publications, please contact the department ADA Coordinator at (voice) 907-465-4120, (TDD) 1-800-478-3648, or FAX 907-465-6078. Any person who believes she/he has been discriminated against should write to: ADF&G, P.O. Box 25526, Juneau, AK 99802-5526 or O.E.O., U.S. Department of the Interior, Washington, DC 20240.

PUBLICATION ABSTRACT

TITLE/SUBTITLE Alaska Salmon Enhancement Program 1998 Annual Report		<u>CONFIDENTIALITY</u> <input checked="" type="checkbox"/> AVAILABLE TO PUBLIC <input type="checkbox"/> AVAILABLE TO LEGISLATURE ONLY
ABSTRACT (100 words maximum) The Alaska Department of Fish and Game oversees and regulates all state and private sector salmon rehabilitation and enhancement projects. Protection of Alaska's natural salmon stocks requires biologically thorough permitting processes. Geneticists, pathologists, and biologists review all fishery projects prior to the issuance of a permit to operate a salmon ranching facility, transfer eggs or fish, or release any fish into Alaska waters. Pathology, genetic, and coded wire tag and otolith processing laboratories are maintained to provide both diagnostic information to department fishery managers inseason and technical expertise to the private sector. Over 1.7 billion salmon eggs were collected by Alaska hatchery operators in 1998. In addition, 1.4 billion fish were released and over 34 million fish were harvested in common property fisheries as a result of the ocean ranching program. This harvest represents 25% of the 1998 commercial common property harvest of 136 million fish. The ocean ranching program provides hundreds of Alaskans with seasonal and full-time jobs.		<u>SUBJECT CATEGORY</u> <input checked="" type="checkbox"/> NATURAL RESOURCES <input type="checkbox"/> EDUCATION <input type="checkbox"/> SOCIAL SERVICES <input type="checkbox"/> HEALTH <input type="checkbox"/> TRANSPORTATION <input type="checkbox"/> LAW ENFORCEMENT <input type="checkbox"/> COMMERCE & INDUSTRY <input type="checkbox"/> GENERAL GOVERNMENT <input type="checkbox"/> LOCAL GOVERNMENT <input type="checkbox"/> OTHER

The Alaska Department of Fish and Game (ADF&G) oversees and regulates all state and private sector salmon rehabilitation and enhancement projects. Protection of Alaska's natural salmon stocks requires biologically thorough permitting processes. Geneticists, pathologists, and biologists review all fishery projects prior to the issuance of a permit to operate a salmon ranching facility, transfer eggs or fish, or release fish into Alaska waters. Pathology, genetic and coded wire tag and otolith processing laboratories are maintained to provide diagnostic information to department fishery managers in season as well as technical expertise to the private sector.

Nearly 1.8 billion salmon eggs were collected by Alaska hatchery operators in 1998. In addition, 1.4 billion fish were released and over 26 million fish were harvested in common property fisheries as a result of the ocean ranching program. The ocean ranching program provides hundreds of Alaskans with seasonal and full-time jobs.

Prince William Sound and Southeast Alaska are the predominant regions affected by the enhancement program, and pink and chum salmon are the predominant species reared. Production levels, in terms of egg takes and releases, have largely stabilized. Programs have matured and are generally at planned capacities.

The salmon enhancement program includes several components: 3 state hatcheries, 26 operating private nonprofit (PNP) hatcheries, 3 federal or Bureau of Indian Affairs (BIA) hatcheries, and several streamside incubation and restoration projects. State hatcheries are operated by the department's Division of Sport Fish and primarily produce salmonid species targeted for sport fisheries. PNP hatcheries, owned by PNP corporations, are permitted to operate salmon hatcheries and recoup their operational costs from a special harvest of adult fish, called a cost recovery harvest. All other returning adult fish are available for harvest in Alaska's common property (public) fisheries. Federal hatcheries are generally used for research, streamside incubation projects enhance specific waters inexpensively, and stream restoration projects involve restoring streams degraded by human-use activities.

Highlights in 1998:

- One hatchery was closed in 1998. Cook Inlet Aquaculture Association (CIAA), suspended operations at Eklutna Hatchery and transferred most of the Eklutna projects to Trail Lakes Hatchery.
- In 1998, 25% of Alaska's commercial common property harvest of salmon was produced by the enhancement program.
- In 1998, 28% of the total return of enhanced salmon went to cost recovery, compared to 40% of the total return of enhanced fish that were harvested for cost recovery in 1997.
- More than 450,000 hatchery-produced fish representing 10 species (chinook, coho, pink, sockeye, and chum salmon; steelhead, lake and rainbow trout; Arctic char and grayling) were caught by sport fishermen in 1998.
- Many hatcheries throughout the state had excellent survivals from release to return. The highest percent survivals were: coho-18% (Kitoi smolt release), pink -14% (Armin F. Koernig fry release), and sockeye- 33% (Main Bay smolt release).
- In general the Alaskan hatchery program is very stable. Programs have matured and hatcheries have reached their permitted capacities. Eggtakes and release numbers are very similar to prior years. However, because of excellent ocean survivals, the Alaskan hatcheries had their all time largest salmon (all species combined) returns in 1998.
- Returns of chinook and coho salmon to Gastineau Hatchery contributed 31% and 32%, respectively, of the total Golden North Salmon Derby catch of these species in 1998.
- Northern Southeast Regional Aquaculture Associations's Medvejie Hatchery chum salmon program had its largest return ever of 3 million adults.

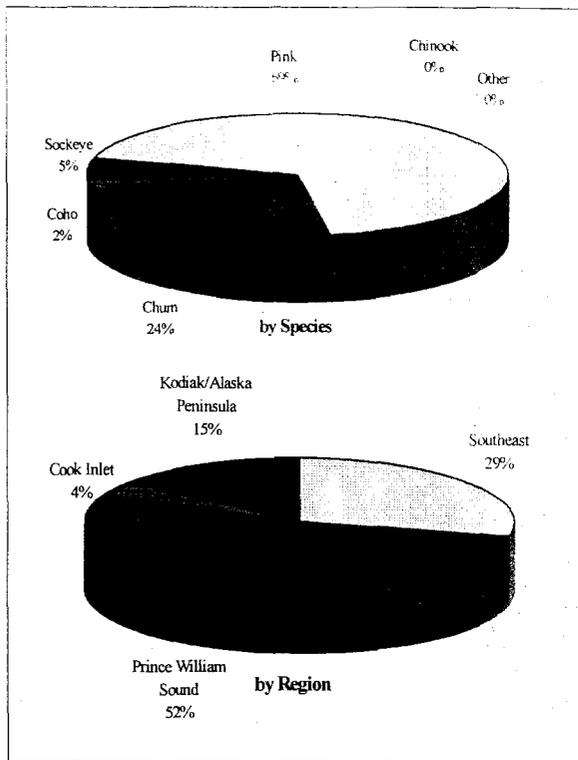

Figure 1. Total returns to enhancement projects in 1998.

- The Ketchikan coho salmon sport fishery (composed largely of Southern Southeast Regional Aquaculture Association fish) was the most successfully fall coho fishery monitored by ADF&G during 1998, with harvest rates as high as 1 rod hour/fish harvested.
- More than 75% of all fish caught in the commercial common property fisheries of Prince William Sound were produced by area hatcheries.
- More than 40,000 pounds of salmon were donated by Solomon Gulch Hatchery and flown, courtesy of the Air National Guard, to villages on the Yukon River to help areas with poor salmon returns.
- The harvest of pink salmon from the CIAA operated Tutka Hatchery accounted for 62% of the total commercial common property harvest of pink salmon in Cook Inlet.

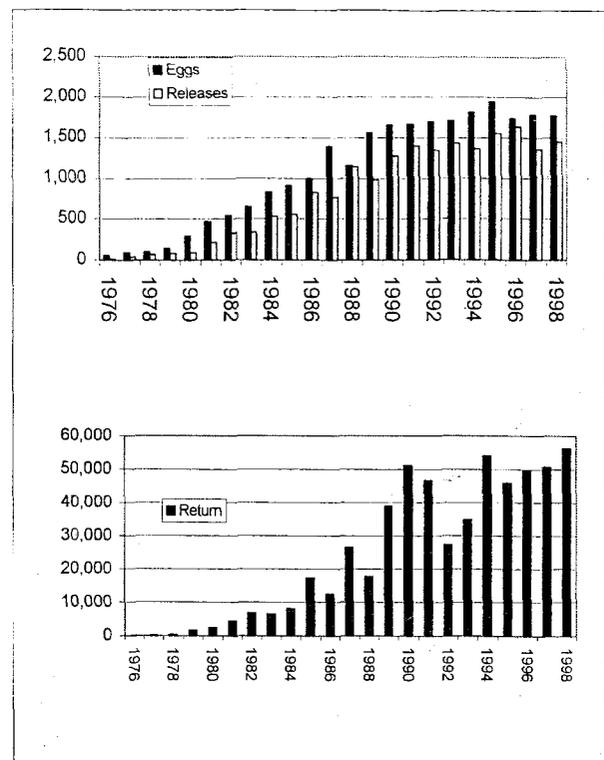

Figure 2. Total egg takes, release, and returns to the enhancement program in 1998.

- The preliminary 1998 Kodiak enhanced salmon harvest of 7.6 million fish represented about 29% of the total Kodiak commercial harvest. Coho enhancement contributions provided 35% of that area's coho salmon harvest.
- In August 1998 the *Yukon River Comprehensive Salmon Plan For Alaska* was completed after nearly five years of development.
- The Norton Sound/Bering Strait Regional Aquaculture Association participated in their first season of cooperative projects since becoming a state recognized aquaculture group in July of 1997.
