

## LAKE SURVEY

STATE OF ALASKA  
DEPARTMENT OF FISH AND GAME  
DIVISION OF SPORT FISHLAKE SUMMARY  
Kenai D-3  
T 8 N R 10 W Sec 16-20-21LAKE STORMYLong. 151° 03' Lat. 60° 47'

1. Other names of lake None THREE BAYS
  2. Accessibility (how reached, condition of roads) NORTH KENAI ROAD - 27 MILES FROM KENAI - ROADS IN GOOD SHAPE elevation: 100 FT.
  3. Outlet (immediate and main drainage) DRAINS INTO SWANSON RIVER permanency OPEN IN SUMMER MONTHS size:                      c.f.s. Y4
  4. Dam in outlet PRESENT distance from lake SHORE height 2' effect on level NOT SIGNIFICANT owner BEAVER
  5. Inlets (name and permanency) SEMI-PERMANENT size:                      c.f.s.                       
Very small + draining swampy area - 2 inlets observed.
  6. Pollution (kind, source, severity) NONE OBSERVED
  7. Immediate shore (topography, soil, cover) LOW HILLS, SWAMP, SPRUCE, BIRCH, ALDER
  8. Surrounding country (topography, soil, cover) LOW HILLS, SWAMP, SPRUCE, BIRCH, ALDER
  9. Use (private, public, semi-private) Public public fishing site
  10. Approximate number of cottages NONE resorts                      boat liveries
  11. Fishing: general reputation Good Fishing in Summer and Winter. history: UNKNOWN
- reported by: Homesteader
12. Intensity (heavy, medium, light) LIGHT summer LIGHT winter LIGHT  
Other uses NONE
  13. Area 390 shore development                      maximum depth 50 FT.
  14. Area of vegetation (acres)                      percent shoal (less than 15 ft) 25%
  15. Slope at drop-off (gradual, steep) GRADUAL EXCEPT FOR LIMITED
  16. Bottom soil: shoal Mostly Mud over Rocks deep water
  17. Color CLEAR Secchi disk (range)                      turbidity
  18. Cover (kind, abundance) Lilly Pads and Reeds -
  19. Vegetation (type, abundance) AREAS MARKED ON MAP
  20. Food (abundance, dominant organisms): plankton                       
bottom: shoal                      depths                       
vegetation
  21. Spawning grounds (summarize observations and reports) NONE OBSERVED ON SHORELINE.  
LIMITED SPAWNING AREA IN OUTLET. SUCKERS SPAWNING ON LIMITED ROCKY AREAS ALONG THE SHORE.
  22. Predators (kind and abundance) 2 LOONS
  23. Severity of fish losses NONE OBSERVED cause
  24. Game fish Rainbows, Arctic Char abundance ABUNDANT dominant size in catch 1/2 LB.  
growth rate SLOW
- other fish SILVER SALMON - SMALL SUCKERS, STICKLEBACKS
25. Continuations (use item numbers):  
THE LAKE IS LOCATED WITHIN THE PROPOSED CAPTAIN COOK STATE PARK
26. Prepared by WATSGOLD + PIERSON Date of survey JUNE 8-9, 1966
