**JUSTIFICATION:**

The escapement goal for sockeye salmon into the Ayakulik River drainage is 140,000 to 280,000 fish. As of June 8, the weir count was 96,893 sockeye salmon. Based on historical run timing, about 17% of the sockeye salmon escapement is achieved by this date. The department expects the final weir count to exceed the escapement goal for this stock. To provide additional sport fish harvest opportunity as provided for in 5 AAC 75.003 (2) (A), the bag and possession limit for sockeye salmon, 20 inches or greater in length, in the Ayakulik River drainage is increased to 10 fish.
