JUSTIFICATION:

The Copper River personal use fishery is managed under direction outlined in the Copper River Personal Use Dip Net Salmon Fishery Management Plan (5 AAC 77.591). The plan establishes the season from June 7 through September 30, and directs the department to establish weekly periods based on Miles Lake sonar counts. During June 15 – 28, there were 105,601 salmon counted past the Miles Lake sonar. The preseason projection for this period was 56,097 salmon, which results in a surplus of 49,504 salmon. Copper River sockeye salmon migratory timing and the previous five-year average harvest and participation rates indicate sufficient numbers of salmon available to justify an increase of 36 hours above the preseason schedule to 168 hours of fishing time during the week of July 6 – July 12.
