### **JUSTIFICATION:**

The *Kenai River Late-Run Sockeye Salmon Management Plan* stipulates that the department may increase the bag and possession limit, as appropriate, when the department determines that the abundance of late-run Kenai

River sockeye salmon exceeds 2,300,000 fish and the sustainable escapement goal (SEG) of 750,000 – 1,300,000 sockeye salmon will be achieved.

As of July 20, 2022, the department projects the Kenai River sockeye salmon run is greater than 2.3 million fish and anticipates the SEG will be achieved. Determining if the escapement goal will be achieved is done by subtracting the anticipated inriver sockeye salmon harvest above the river mile 19 sonar from the projected end of season total inriver run estimated at the sockeye salmon sonar. Therefore, it is warranted to increase the bag and possession limits for salmon, other than king, pink, and coho salmon, to six per day and twelve in possession.
