Subject: Re: Public Perception on aquaculture

Apologies! Somehow this sent while I was beginning to type a message...

I meant to send an electronic introduction. I'm a Knauss Marine Policy Fellow at NOAA's Office of Education, and one of my tasks for this Fellowship year has been to develop a literature review of the public perception of aquaculture for the aquariums we work with to use for messaging to their audiences. Laura Hoberecht introduced me to Julie Decker, who told me about the Alaska Mariculture Initiative.

I'd love to discuss more and learn about your local expertise on communicating aquaculture to your audiences. We work with the Alaska Sea Life Center, who is interested in participating, but have limited literature on Alaska's opinion on aquaculture (as you can see in my attached PowerPoint).

Thank you!
Maggie Allen
