Edward J. Cramer, Fishery Biologist, Anchorage
Rupert E. Andrews, Fishery Biologist, Palmer
George L. Van Wyhe, Fishery Biologist, Glennallen
Roger J. Reed, Fishery Biologist, Fairbanks

Introduction

This report of progress consists of the Job Completion Reports from the State of Alaska's Federal Aid in Fish Restoration Project F-5-R-2, "Sport Fish Investigations of Alaska".

The current Project is composed of eighteen separate studies and were designed to evaluate the various aspects of the State's recreational fisheries resources. The information gathered will provide the necessary background data for the development of future programs. During the current segment continued emphasis was placed on overall inventorying of accessible waters and the evaluation of general catch data.

Several problems of immediate concern appeared sufficiently defined to warrant independent studies. As a result, two independent creel censuses, one experimental silver salmon egg take and a Resurrection Bay area silver salmon population study were instigated. Data accumulated from prior jobs dealing with the Arctic grayling has resulted in the formulation of three separate investigations during the current segment.

The rapid expansion of Alaska's population is being reflected in the ever increasing numbers of "No Trespassing" signs encountered in the vicinity of population centers. Fortunately, much of Alaska's fishing waters are still in the public domain. An aggressive program of acquiring access to fishing waters, instigated in 1959, was continued during the present segment. Increased emphasis is being placed on this job and the successful continuation of this activity, now and in the immediate future, will forestall many of the serious recreational use problems currently facing other states.

The enclosed progress reports are fragmentary in many respects and the interpretations contained therein are subject to re-evaluation as the work progresses.

ANNUAL REPORT OF PROGRESS
INVESTIGATIONS PROJECTS
COMPLETION OF 1960 - 1961 SEGMENT

State: ALASKA

Project No: F-5-R-2 Name: Sport Fish Investigations
of Alaska

Job No: 5 Title: Investigation of Alaska's
Public Fishing Access
Requirements

Period Covered: June 10, 1960 to June 9, 1961.

Abstract:

The evaluation of 822 lakes and streams for access needs, resulted in the selection, reservation, and the processing of fifty-three areas encompassing 247.8 acres. The areas of effort were scattered throughout the State.

The principle effort of the project centered on right-of-ways leading from existing and proposed roads to suitable recreational fishing areas. Fifty-three angler access trails were surveyed, of which fifteen were platted and processed with responsible agencies, twenty-four were held in abeyance pending further data, and fourteen were abandoned when conditions required such action. An additional acquisition of three use-sites and the necessary rights-of-way were a result of negotiations with private individuals.

Forty-seven sites were recommended for access acquisition, but processing was delayed until necessary land survey records become available. The locational and descriptive data on sites processed are tabulated.

Objectives:

To investigate the recreational fishing waters with emphasis on public domain areas adjacent to existing and proposed State Highway systems.

To evaluate the existing fisheries and the recreational potential of those fisheries in terms of probable future access requirements.

To initiate the necessary and orderly action for acquisition of the recommended sites.

Introduction:

Statehood (1958) triggered a land entry movement of large proportions; consequently new problems were created regarding public access to the fishery and wildlife resource. From 1959 through early 1961, large numbers of homestead, trade and manufacturing, residential, and recreational sites were entered in the general rush ahead of State land selection activities. The concentration of the entries, and the later patented lands, are adjacent to existing roads and access trails. These resulted in the immediate posting and consequent closure of former fishing and hunting trails. Concentration of work was shifted from a primary site acquisition oriented effort to one of surveying, recording and otherwise acquiring existing and/or new access trails rights-of-way. The status of sport-fishery access and use-sites recommended and processed during the 1959-1960 program segment was closely followed.

Techniques:

Procedures and techniques used were the same as reported and listed in the 1959-60 Progress Report, with use of the following additional methods:

1. General grant of right-of-way over public domain of the United States, (43 USC 932, R.S. 2477).
2. Reservation of land form appropriation for public purposes, (43 USC 154).
3. Grants of right-of-way across mental health lands, (48 USC 46-3 and portions of Title 11-Alaska Natural Resource regulations).
4. Special Land Use Permit, (43 USC 2-43 CFR 258).

5. Selection of tracts adjacent to or expected to be community growth zones or potential recreational areas, (Alaska Statehood Act, PL 85-508, Sec. 6a).

A number of other methods, utilizing newly developed administrative procedures, were made use of during the various phases, or steps, in processing each site recommended for acquisition. For conciseness and brevity in reporting of progress, minutiae procedures will not be stressed.

Progress

During the period of June 10, 1960 to June 9, 1961, a concentrated effort on the physical evaluation of certain waters, information gleaned from local residents, and use of inventory-cataloging data on 822 waters, resulted in acquisition of 53 use-sites. The sites encompassed 247.8 acres with average of four acres per site, and will provide public access to 14,907 feet of lake frontage and 17,142 feet of stream frontage. An additional 81,540.5 feet of rights-of-way were acquired.

The sites and/or rights-of-way requested and processed during the first segment of this project were acquired as selections or classifications of land-use were made by the Division of Lands. The State has gained patent to six sites which have been permanently set aside for public access and use-site purposes. These sites total 78.24 acres, and are located on three lakes. An additional ten plus acres on two rivers are in the process of being classified as public access and recreational strips. The strips parallel the rivers through the entire area selected.

Field work for this period ranged throughout Alaska, with primary effort on highway-side areas on public domain.

In view of the widespread and scattered nature of this period's progress, attempts to relate all the exact information within the text would be unduly lengthy. For locational and descriptive data, refer to the respective maps and tables.

Areas of investigations and action were (1) Eureka-Glennallen, (2) Mentasta-Tok, (3) Sourdough-Summit Lake,

(4) Chatanika-Circle, (5) Chitna-McCarthy, (6) Little Chena-Chena Hot Springs, (7) Paxson-McLaren River portion of Denali Highway, (8) Juneau-Eagle River, (9) Haines-Klukwan, (10) Petersburg-road system, (11) Coho (Kenai), (12) Liven-good-Tolovana road system, (13) Palmer-Willow, (14) Upper Talkeetna River system, and the (15) Peters Creek-Deshka River areas (refer to general location map).

Results are enumerated according to the method of acquisition:

43 USC 932: Use of grant of right-of-way over, upon and across unappropriated and unreserved lands of the United States, resulted in 15 rights-of-way dedicated to public access use. A total of 31,670.10 feet of trails right-of-way to 934 feet of lakeshore frontage, and adjacent to 8,597.08 feet of stream shoreline was processed with the responsible agencies.

A total of 53 rights-of-way were actually surveyed and platted, however, due to subsequent changes in the status of land ownership, additional information on the existing fisheries, and/or a need for relocation surveys, 24 rights-of-way are being held in abeyance.

Fourteen rights-of-way were abandoned when use of other forms of acquisition were found more effective and efficient. (Maps 3, 4, 5 and 7, Appendix A; Table 1, Appendix B).

<u>Map & Site No.</u>	<u>Waters Provided Access</u>	<u>Area Location</u>
3-1	Cache Creek	Eureka
3-2	Jerky Lake	Eureka
3-3	Lost Cabin Lake	Eureka
5-4	Mineral Lakes	Mentasta Pass
3-5	Fielding Creek	Summit Lake
3-6	Gillispie Creek	Sourdough
3-7	Haggard Creek	Sourdough
3-8	Moore's Lake	Summit Lake
3-9	Clear (Denali) Creek	Tangle Lakes
4-10	Silver (Van) Lake	Strelna
4-11	Railroad Lake No. 1	Strelna

0- 0	Richardson-Clear	Fairbanks	x	x	Pending

43 USC 154: Reservation of lands for public purposes was used for the first time, with the result that 13 sites of 73.735 acres (average 4.4 acres per site) were processed through the Bureau of Land Management.

Initially, effort was expended in hopes that certain sites would be selected by the State, however, this approach was found to be unworkable.

Before the State can gain patent to unsurveyed lands, a boundary survey must be made on a minimum of nine sections. Due to the small size of each site desired, the isolated and scattered nature of the tracts and the non-agricultural aspect of the topography, the only approach, in this instance, to satisfying future access needs was believed to be via reservation. Refer to Table 3, Appendix B for legal descriptions. Descriptions are in aliquot parts of natural township subdivision and are based on Department of Interior township-range protractations (new).

State Selection and Classification (Alaska Statehood Act,
Sec 6(b) :

The Division of Lands, Alaska Department of Natural Resources, was requested to select and/or classify on existing selected lands, 19 sites consisting of 75.751 acres on nine lakes and five streams.

The following elements were considered in making selection requests:

1. Sites were within surveyed areas or,
2. Sites, if in unsurveyed areas, must be within a region suitable for nine plus section application.
3. Proximity to existing or proposed roads.
4. Distance from population centers.
5. Nature of the existing fishery and its estimated present or future potential value to the sports angler and gross regional economy.
6. Status and nature of population movements.

The following site requests were based on one or more of the above criteria. Refer to Maps 2 and 4, Appendix A and Table 4, Appendix B for legal descriptions.

<u>Map & Site No.</u>	<u>Name of Water</u>	<u>General Location</u>	<u>No. of Sites</u>
2-33	Croto Creek-Deshka River	Talkeetna	2
4-34	Finger Lake	McCarthy	2
2-35	Griffith Lake	Talkeetna	1
----	Falls Creek	Petersburg	1
4-37	Knutson Lake	Chitna	1
2-38	Lake Herbert	Talkeetna	1
4-39	Long Lake	McCarthy	1
----	Lost (Chisholm) Lake	Fairbanks	1
4-40	Railroad Lake #2	Chitna	1
4-41	Robe Lake	Valdez	1
4-42	Silver (Van) Lake	Chitna	3
4-43	Station Lake	Chitna	1
2-44	Big Susitna-Yentna River	Talkeetna	1

The State Division of Lands has, on recently acquired lands, classified 88.24 plus acres, existing on three lakes and two streams as public access and recreational areas.

<u>Map & Site No.</u>	<u>Water</u>	<u>Location</u>
1-55	Eagle River	Anchorage
1-56	Railroad Lake #1	Wasilla
1-57	Railroad Lake #4	Wasilla
1-58	Railroad Lake #5	Wasilla
----	Beaver Creek	Kenai

48 USC 46-3: Under said provisions, a right-of-way of 931.2 feet in length and fifty feet in width, was processed over mental health (State) selection lands in the Upper Chilkat River Valley (59). Action was taken in order to perpetuate a river-boat portage route. Refer to Map 8, Appendix A, and Table 5, Appendix B.

Alaska Statehood Act, Sec 6a: Under the provisions of the community-recreation land grants relinquishments from national forests, requests were submitted for the selection and subsequent classification of three sites totaling 3.285 acres in the Juneau area. These tracts are to provide access and parking areas adjacent to (45-46) Peterson Creek and (47) Salt Lake. At the time of this report, the lands

are reserved under PLO 842, but revocation will occur shortly, and subsequent State selection will be made under this grant. Negotiations for easements on patented lands along lower portions of Peterson Creek should be initiated in the near future for increasing the access to the steelhead fishery. Refer to Map 8, Appendix A and Table 6, Appendix B.

43 USC 2 - Special Land Use Permits (BLM): Application was submitted to the Bureau of Land Management for use of an 8.24 acre site on Falls Creek. This site was covered earlier by Special Land Use Permit issued to the U. S. Fish and Wildlife Service, but was apparently terminated during period 1959-1960. In order to assure public access and use to that portion of Falls Creek, action was taken using this procedure. The Permit was submitted with the express reservation that it terminate upon State selection and subsequent classification as a public access and recreation site. (Table 7, Appendix B).

43 USC 931-F.A.A.: Requests were resubmitted to the Division of Highway (Fairbanks) for the acquisition of additional rights-of-way along portions of the Fairbanks-Chena Hot Springs Route 650. Three river-boat launching sites of 7.68 acres total were recommended for rights-of-way acquisition. (Map 6, Appendix A).

<u>Map & Site No.</u>	<u>Name of Water</u>	<u>Highway Station Location</u>	<u>Acreage</u>
7-48	Chena River	Mile 28.94	3.32
7-49	Chena River	Mile 37.92	1.05
7-50	N. F. Chena River	Mile 44.76	3.31

Through efforts of earlier rights-of-way personnel in the Division of Highways, four sites, totalling 28.2 acres on five streams are presently being acquired along the Willow-Talkeetna Route 35:

<u>Map & Site No.</u>	<u>Stream</u>	(From Willow) <u>Hwy. Station Location</u>	<u>Acreage</u>
2-51	Roger Creek-Little Willow Creek	Mile 4	7
2-52	Sheep Creek	Mile 17	3.5
2-53	Montana Creek	Mile 22	7.5
2-54	Kashwentna Creek	Mile 13	10.2

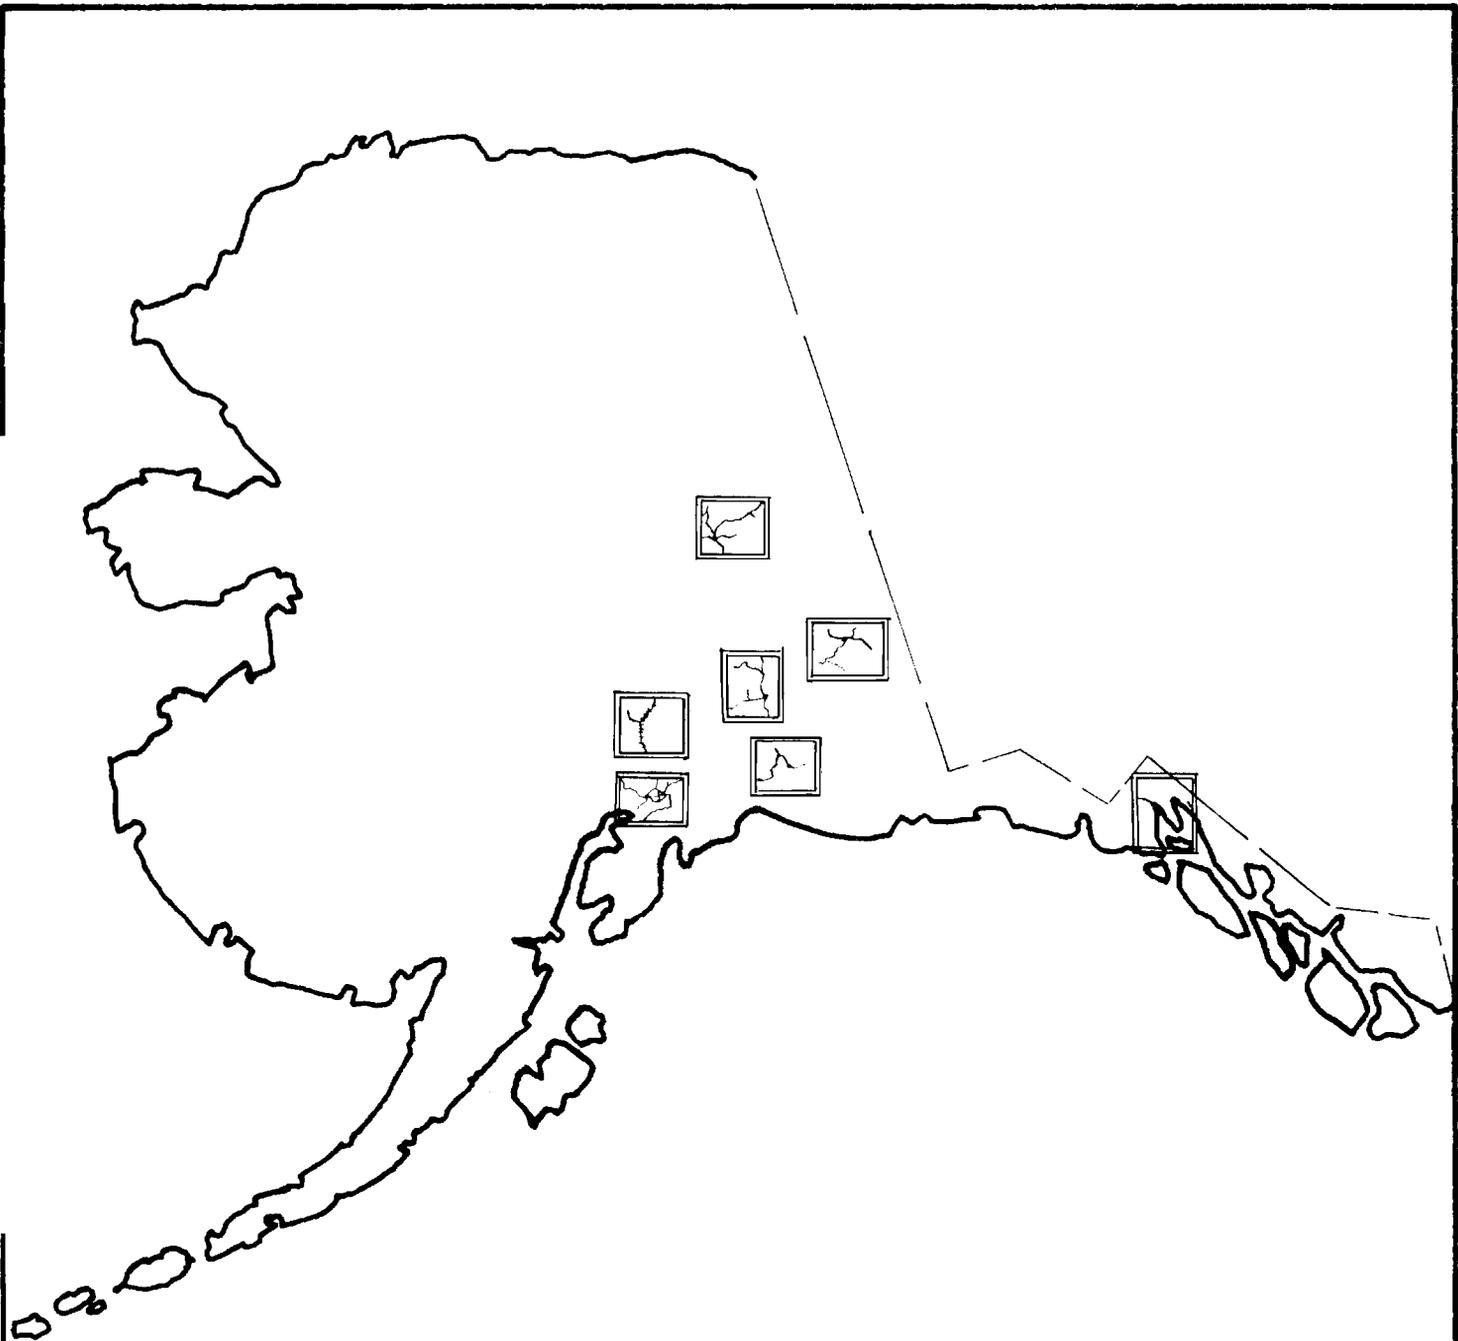

Forty-seven sites located in the Colville River to Kobuk River area, the Selawick-Innoko area and the Upper Susitna-Talkeetna River areas have been recommended for acquisition. However, processing of these specific sites is pending the receipt of new township-range protractations. Due to a real need for accurate tract locations and descriptions, the newly completed protractations of existing surveyed areas will assist in reducing the possibilities of incorrectly locating the acquisitions.

Specific site requests for the Tikchik-Wood River area were withdrawn during this period. The State has made application for selection of 750,000 plus acres with views of creating a State Park, therefore, the access needs are satisfied.

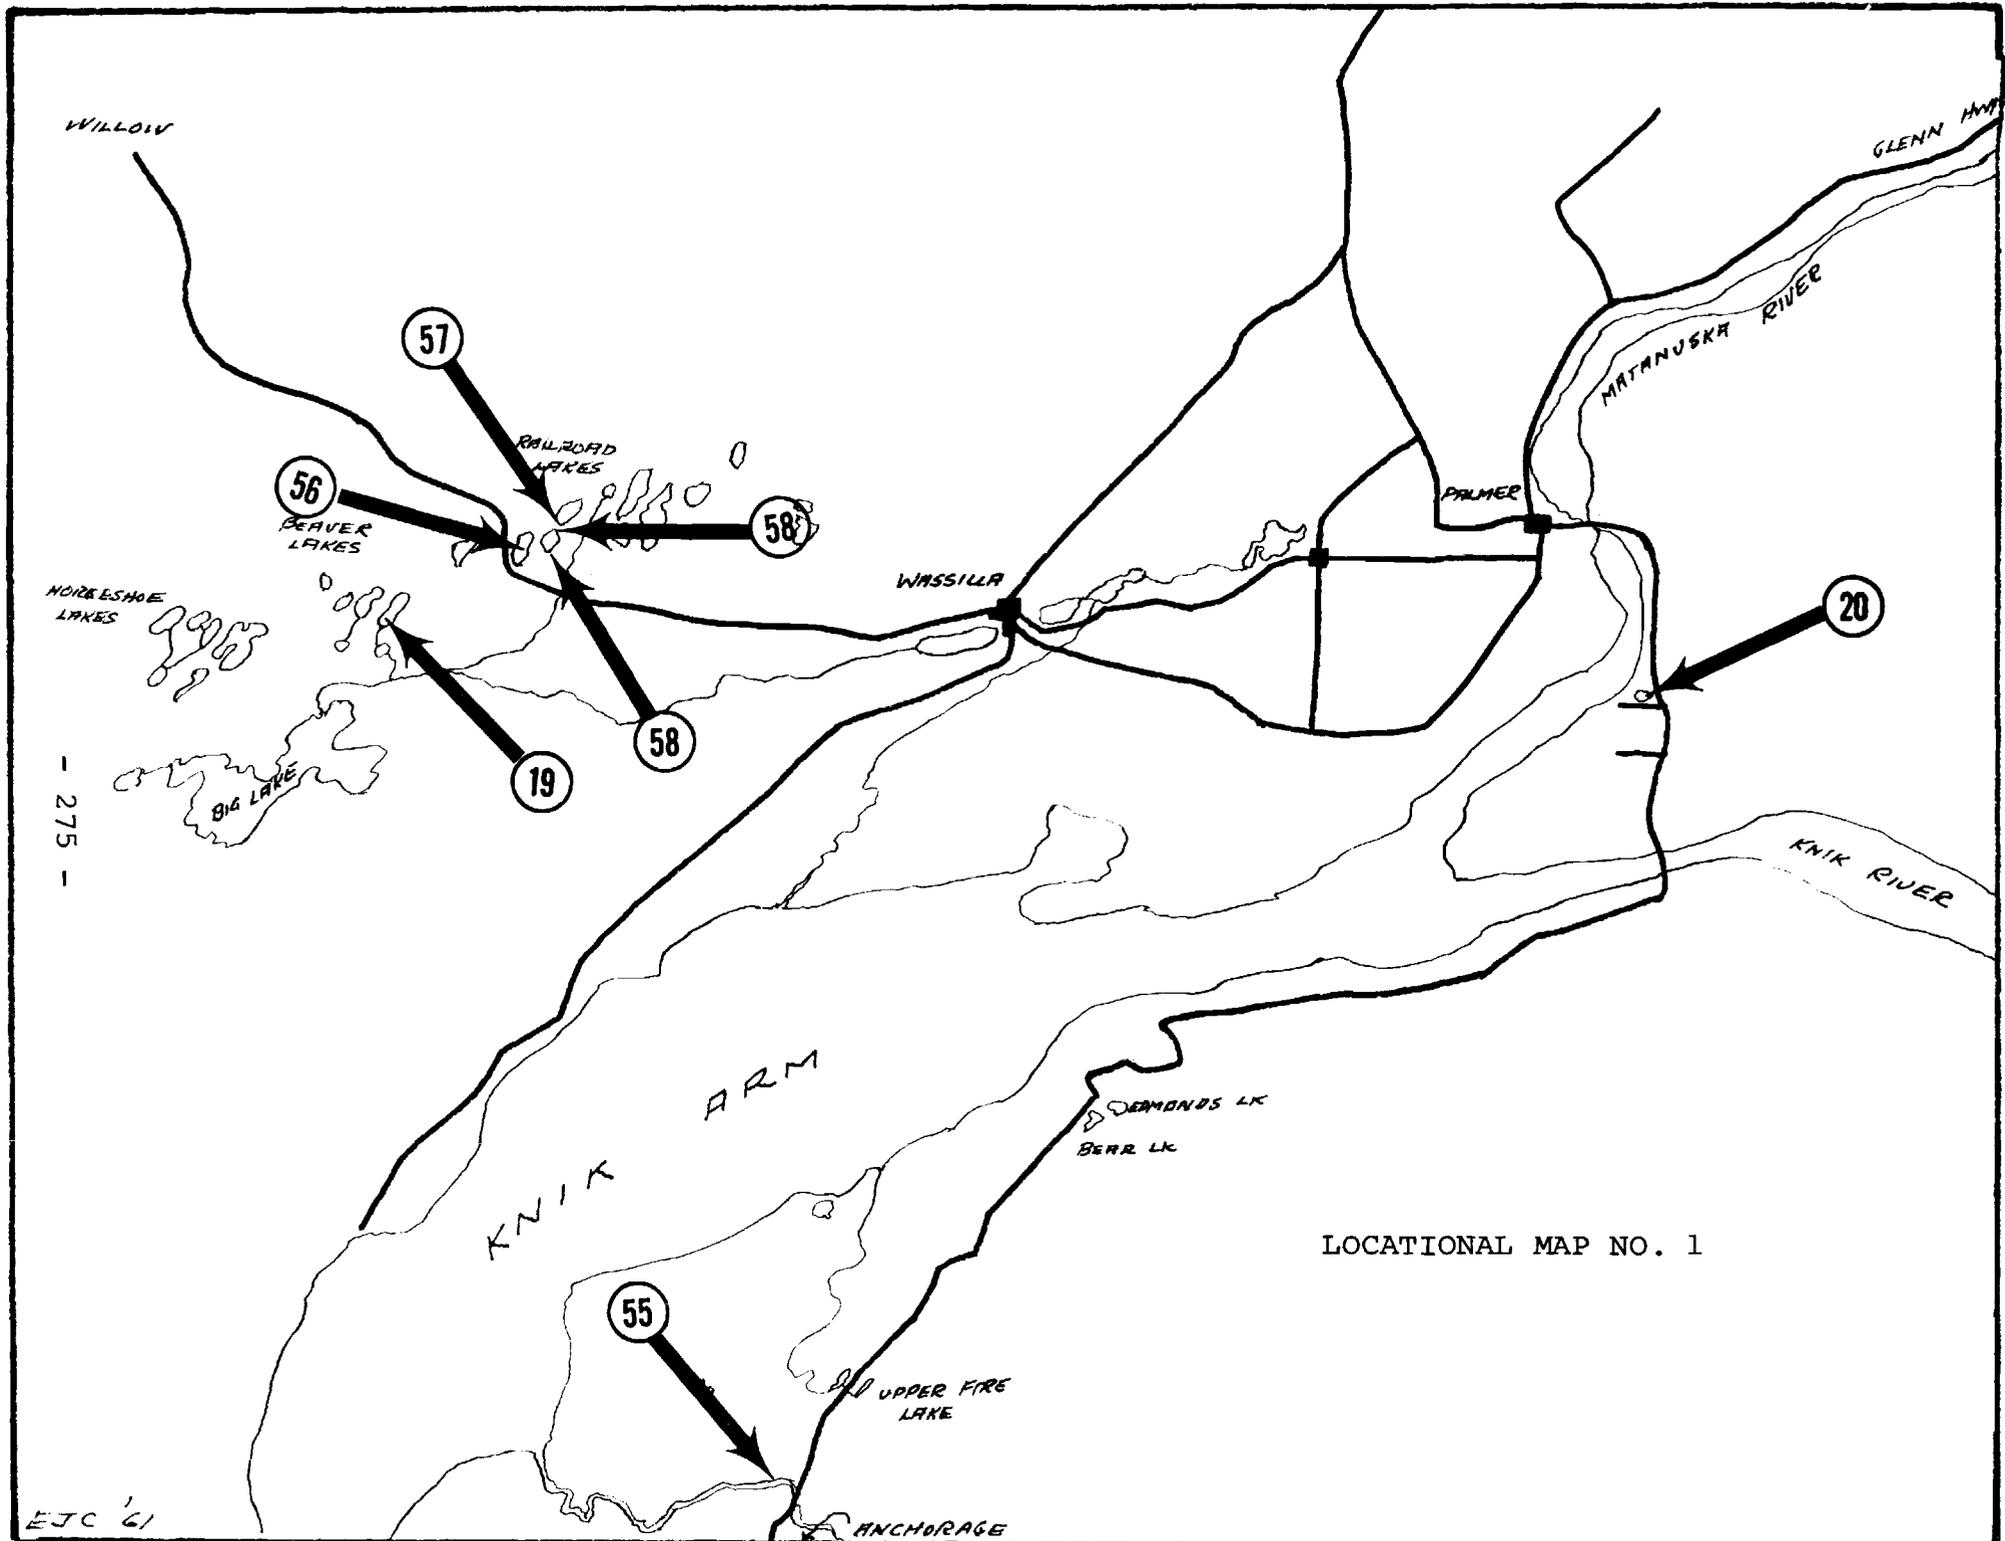

Discussion:

Several significant points pertinent to the acquisition of fishing areas appeared during this segment. These were either not apparent or not present in the 1959-1960 segment. The various over-shadowing influences and problems encountered were:

1. Increase in "nuisance value" land entries created an ownership status problem for negotiation purposes.
2. Suspected fraudulent entry and homestead prove-up added confusion as to the exact entryman or titlemen for negotiation activity.
3. Access elimination through land entry and immediate posting of all trails and roads against ingress-egress by entrymen, is creating a monopoly of recreational usage in over four and one half million acres of sport fishing waters and big game hunting range.
4. A state of nervous tension and apprehension which, apparently, most entrymen succumb to, creates a difficult situation regarding negotiations for "public" rights-of-way. The entryman remains in this frame of mind until patent is issued--then regains normalcy.

APPENDIX B

TABLE NUMBER	ACQUISITION METHOD	NAME OF WATER	R.O.W. LENGTH	R.O.W. WIDTH	STREAM OR LAKE FRONTAGE	LEGAL DESCRIPTION	ACREAGE
6	Sec 6(a), Alaska Statehood Act	Peterson Creek			260.00'	<u>Sec 24, T39S, R64E, CRM.</u> NE ⁴ NW ⁴ NE ⁴ NW ⁴ SE ⁴ .	.62
7	43 USC 2	Falls Creek			481.80'	<u>Sec 11, T60S, R69E, CRM.</u> S ² of Lot 5, W ² SW ⁴ NW ⁴ SE ⁴ .	8.24
8	State Selection, Classification and Subdivision of School Lands	Railroad Lake #1 (Loon)			603.00' (1)	Lot 27, Block 1, Cheri Lake Subdivision Sec. 36, T18N, R3W, SM.	8.25
		Railroad(School-Cheri)Lake #5			1001.00' (1)	Lot 24, Block 6 and Lot 16, Block 9.	53.76
		Railroad Lake #4			450.00' (1)	Lot 6, Block 8.	16.23
		Beaver Creek (Kenai)			1000.00' (s)	Portions of Stream Bank in Sec. 36, T6N, R11W, SM.	5.0
		Eagle River			1200.00' (s)	Portions of Stream Bank in Sec 16, T14N, R2W, SM.	5.0

5. The cabin-home looter and the litterbug are reducing opportunity of gaining access on private lands. Complaints submitted by present donators of land and the arguments received from possible donators against releasing R.O.W. and use-sites substantiate the extent of this problem.

Recommendations:

- 1) Closer liaison with the Bureau of Land Management Withdrawals Section. Consideration based on the fact of an abrupt change of their 1959-1960 policy of "No Withdrawal" of small areas at the State's request.
- 2) Extension of effort and selections for future access site needs into presently remote areas.

Acknowledgements:

The following personnel and agencies rendered material assistance to this job segment:

1. Division of Lands, Alaska Department of Natural Resources.
2. John Snell, Rights-of-Way (formerly), Division of Highways.
3. Martin Roth, Rights-of-Way (formerly), Division of Highways.
4. Regional Management Biologists, this department, throughout the State.
