Edward J. Cramer, Fishery Biologist, Anchorage  
Rupert E. Andrews, Fishery Biologist, Palmer  
George Van Wyhe, Fishery Biologist, Glennallen  
Henry J. McKirdy, Fishery Biologist, Fairbanks

## INTRODUCTION

This report of progress consists of the job completion reports from the State of Alaska Federal Aid in Fish Restoration Project F-5-R-3, "Sport Fish Investigations of Alaska."

The current project is composed of twenty separate studies and was designed to evaluate the various aspects of the State's recreational fishery resources. The information gathered will provide the necessary background data for better management practices and for the development of future studies. During the current segment, continued emphasis was placed on the overall inventory and cataloging of accessible waters, evaluation of catch data, and investigations on various species of fish.

As a result of several problems of immediate concern, several new studies were instigated during the report year. Data accumulated from these studies has helped solve some problems in projects already in progress.

The population of Alaska is increasing rapidly and this is being reflected in the ever increasing number of "No Trespassing" signs put up by individuals in the vicinity of population centers. Fortunately, much of Alaska's fishery waters are still in the public domain. The division's program of acquiring access to fishing waters continued at a much faster pace since being instigated in 1959. Emphasis is being placed on this job and the successful continuation of this activity will forstall many serious recreational use problems currently facing other states.

The enclosed progress reports are fragmentary in many respects and the interpretations contained therein are subject to re-evaluation as the work progresses.

JOB COMPLETION REPORT  
RESEARCH PROJECT SEGMENT

State: ALASKA

Project No: F-5-R-3 Name: Sport Fish Investigations  
of Alaska

Job No: 9-G Title: Investigations of  
Alaska's Public Fish  
Access Requirements.

Period Covered: June 10, 1961 to June 9, 1962

Abstract:

Information obtained from the investigation and evaluation of 420 fisheries for public access needs resulted in the recommendations and the subsequent processing of 79 Use-sites on 86 waters. Total acreage of sites selected is 2,409.82. Effort was extended throughout the State. Need for site acquisition on a given water was based on physical inventory, fishery and angler-use data and information collected in the field from such sources as anglers, lodge-owners, local residents and Eskimo Councils. Techniques are outlined as to the approach to the acquisition of the sites.

Effort was expended on highway and fly-in fisheries existing within present or future State Selection lands. A proposal is submitted recommending that a ten-foot public right-of-way be established on both banks of 48 valuable stream fisheries that in part or whole pass through State lands.

Rights-of-way dedication and private negotiations continued on certain waters, as outlined in this report.

Areas needing additional work were noted, and recommendations concerning these needs submitted. The locational data and other pertinent site information appendancy is tabulated and shown in map form.

Recommendations:

1. Continuation of investigations into off-highway areas.
2. Some form of legislation, on public domain lands, should be implemented to protect entrymen and yet safeguard public rights-of-way. Current legislation lacks this real need.
3. Increase negotiations with private parties in the (1) Anchorage-Matanuska, (2) Fairbanks-Delta, (3) Kenai-Soldotna, and the (4) Juneau-Herbert River areas.
4. Purchase of small sites, in air charter fly-in regions under the R & PP act should relieve a distinct future access site acquisition situation.

Objectives:

To investigate the possible recreational fishing areas in the public domain and to establish the necessity of, and the recommendations for, the selection or withdrawal of lands for public fishing access sites.

Techniques Used:

Phase I

The existing fishery and its estimated potential of providing a higher-use fishery under proper management techniques was evaluated through use of the following sources of data:

1. Inventory - Catalog files of all field fisheries stations.
2. Physical inspection of the waters via aerial, boat and auto means.

3. Interviews with lodge-resort owners, anglers, commercial fishermen, air charter pilots, commercial airlines personnel, big game guides, local Indian and Eskimo Council members.

### Phase II

Determination of land status, extent of cadastral engineering within an area for boundary descriptions, and the outlining of the acquisition methods followed the fishery evaluation. The techniques under which sites were requested or the rights-of-way dedicated are:

1. Congressional General Land Grant to State of Alaska under the Act of 7 Jul 58 (72 State 339-343).
2. Land Use Classification as promulgated by Act of 21 June 34 (43 Stat. 1185; 43 USC 871a), as granted to Alaska by 48 USC 353.
3. Quitclaim of interest to surface waters of a non-navigable body of water, 43 USC 931.
4. Preservation of Federal Rights-of-Way via 44 LD 513.
5. Private negotiations with patentees.
6. Congressional grant of rights-of-way over unreserved public domain (43 USC 932, R.S. 2477).
7. Special Land Use Permit (43 USC 2; 43 CFR 258).
8. Community and Recreational Land Selections (48 USC 6a).
9. Recreation and public purposes Act (43 USC 154).
10. Determination and Dedication of historical-use public trails under provisions of 48 USC 23; 43 USC 74.32 and 244; Section 142.22, Chapter 169, SLA 59.
11. Intra-agency transfer of lands (Section 304.2, Chapter 169, SLA 59).

Findings:

Concentrated effort on the physical evaluation of one hundred seventy-three lakes, two hundred forty streams and seven saltwater environs resulted in requests for 79 use-sites. The 2,409.82 acres of high value access units will provide 115,505.8 feet of stream and lake frontage to the sports angler. Recommendations were submitted and approved, on an additional thirty-two waters, but held in abeyance until certain legal procedures can be instituted, and the associated administrative problems settled.

Land Grant Selections:

Sixty-nine use-sites, fronting on 42 lakes and 32 streams, were recommended and subsequently requested for selection, then later classified as public access-recreation tracts. Sport fishermen will be provided access and use of 32,327 feet of lake and 68,191 plus feet of superior stream frontage. Total acreage involved is 1,238.15, plus some 500 feet of rights-of-way. The following table indicates sites requested; for further data please refer to the Appendix and associated maps.

146-1	Seventeen Mile Lake	Wasilla	1

Several incidents were encountered that directly or indirectly affected public access to sport fishing waters investigations. The most severe area is one where the State must apply for a minimum of some 6,000 acres in unsurveyed domain areas. Our site acreage recommendations are normally of a one-to-twenty acre size, therefore Department of Natural Resources is faced with a larger-than-necessary selection problem. This poses a question on site requests, as to whether access site requests should be made principally on the basis of the whole area of minimum selection, or to consider that the one site and the fishery is sufficiently valuable to the extent of the resulting six thousand acre selection.

A noticeable reduction in homestead, trade and manufacturing, and headquarters site entries was seen during this segment thereby reducing certain problems.

Except for intensified angler rights-of-way problems, as noted in this report, little change in overall access problems occurred during this segment period.

Federal Rights-of-Way Under 44 LD 513:

Access trails surveyed and constructed by the U. S. Fish and Wildlife Service in 1954, and used by the angling public since, were resurveyed and processed per request of the Department of the Interior, Bureau of Land Management. Resurveys were needed due to the fact that on the 1954 traverses, beginning points of each surveyed trail were attached to Richardson Highway mile post signs; these have since been changed as road realignments occurred.

Six rights-of-way were checked, surveyed, and processed for recording with the Bureau of Land Management. Total right-of-way trail is some 12,790 feet, averaging 50-foot widths, and terminating at the requested Gulkana River streamside sites. This river has been included in the public stream bank right-of-way proposal.

TABLE 2

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>Area of Location</u>

7-4	Gulkana River	Gakona
8-4	Gulkana River	Gakona
9-4	Gulkana River	Sourdough

Variations in the interpretation of existing congressional legislation, standard operating procedures, and adjudication created some unusual situations.

Congressional Grant to Alaska of Highway Rights-of-Way:

43 USC 932, provided for public rights-of-way across unreserved public domain, for public highway purposes. However, utilization of this congressional provision was greatly reduced to the working within the Anchorage Land District only. A considerable number of rights-of-way to lakes and streams were surveyed and platted, but are held in abeyance pending CFR clarification. The continuation of acquiring or dedicating fishing trails, in the Fairbanks area, will probably depend on adjudication. The following public access rights-of-way were processed this period:

TABLE 3

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>Area</u>	<u>Action Taken</u>
1-5	Kuck Lake	Livengood	Survey platted, and boundary signs posted.
2-4	Arizona Lake	Tazlina	Resurvey.
3-4	Grayling-Crater Lake	Lake Louise	Survey platted.
57-L	Craig Lakes	Delta Junction	Survey platted and boundary signs posted.
----	Gillispie Creek	Paxson	Resurvey.

Locational and descriptive data are contained in the appendix, Maps 4, 5, and the Locational Map. For examples of the type of surveys completed, please review plats of survey of the above waters in the appendix.

Reservation of Lands From All Forms of Appropriation:

The public domain laws contain a provision for reserving lands from normal appropriation via 43 USC 869 (43 CFR 254). Due to increased entry of lands adjacent to Robe Lake, to the extent that the usable shoreline area was being enclosed, there forming "exclusive fisheries", a request was submitted and approved for the classification and reservation of a 15-acre R & PP site with 850 feet of lake front on this Valdez district fishery. Please refer to site number 99-L--Locational Map.

Intra-agency Transfer of Lands, State of Alaska:

Recommendations were submitted, approved, and transfer requests forwarded to Division of Lands on 7 tracts under the provisions of the Alaska Land Code. Sites have been or are to be transferred to this Department under Section 304.2, Chapter 169, SLA 59. Tracts exist on both freshwater and saltwater environs and will provide 11,784 feet of water frontage and 130 acres of public use site. Please refer to the appendix for locational and descriptive data, and

Maps L, 1, 5, and 8. Table 4, below, indicates site work under concepts of this portion of the report.

TABLE 4

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>General Location</u>

76-L	Eyak Lake & River	Cordova
77-5	Two-Mile Lake	Fairbanks
78-1	Mirror (Bear) Lake	Anchorage
147-1	Fire (Hatchery) Creek	Anchorage

Special Land Use Permit, Bureau of Land Management:

Under the provisions of 43 USC 2 (RS 453, dtd 23 December 54), applications were submitted on three tracts for a total of 27.44 acres with 1,872 feet of lake frontage and 481.80 feet of stream frontage.

TABLE 5

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>Area</u>	<u>Action Taken</u>
79-L	Falls Creek	Petersburg	Re-submitted.
80-7	Ugashik Lake Narrows	Alaska Peninsula	Emergency action in order to retain public use-site.
81-7	Ugashik Lake Outlet	Alaska Peninsula	Emergency action in order to retain public use-site.

Certain changes in the character of land entries pointed to action earlier than was anticipated and action was taken. Please refer to appendix and Map 7.

Access Negotiations with Private Individuals:

Continued work in this field, with effort expended on attempting to gain access to 13 waters entirely surrounded by private lands. Successful conclusion of negotiations on many of the waters is still pending due to changes in title, separation of the parents, divorce, death of titleman, and changes from homestead entry into color of title.

TABLE 6

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>General Area</u>	<u>Action Taken</u>
82-1	Prador Lake	Wasilla	Initiated talks and title search conducted.
90-1	Matanuska Lake	Palmer	Negotiation with Titlewoman terminated.
94-1	Lower Fire Lake	Anchorage	Grant of lake surface accepted.
89-1	Florence Lake	Willow	Grant pending patent.
91-4	Snowshoe Lake	Eureka	Owners offer of sale refused as land was marsh.
83-4	Lee's Lake	Eureka	Grant of R.O.W. or its refusal pending closer review of qualifications specified by entryman.
85-4	Ryan Lake	Eureka	Indecision by entrywoman.
88-L	Bear Cub Lake	Mentasta	Titleman Ohio resident, summer negotiations to resume.

TABLE 6 (Cont'd.)

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>General Area</u>	<u>Action Taken</u>
84-L	Grizzly Lake	Slana	Sale and change of ownership stopped current negotiations.
87-5	Richardson-Clearwater	Delta	Divorce proceeding and determination of community property holds negotiations in abeyance.
86-5	Chisholm Lake	Fairbanks	Negotiations continued, administratrix of estate fears public usage will fire mature spruce stand and increase cabin looting.
92-L	Melnitsa-Dark Lakes	Kodiak	Negotiations cannot be continued until R.O.W. established by Division of Highways.
93-L	Kodiak (Gertrude) Lake	Kodiak	Title search, land status report, appraisal work needed. Conference with Kodiak C of C needed.

Stream-Bank Public Access Rights-of-Way:

Under the provisions of the Department of Natural Resources Title 11, a proposal was submitted to the Lands Commissioner, for the establishment of a public right-of-way parallel to and along the banks of specific streams crossing through saleable State Lands. The proposal, in part, reads as follows:

".....factors contributing to the need of acquiring narrow stream-bank public rights-of-way:

- (1) Nature of Stream Fisheries: The angler, and the general recreationist, needs legal assurance in order to move from pool to pool along the stream in the enjoyment of his pursuits. The pursuit object of an angler--fish, are distributed in specific stream zones. This condition of fish concentration in one area, and generally a lack of fish in other stretches, creates the need for a certain degree of angler freedom of bank movement.
  
- (2) Existing Stream Access Sites: In the past, approach to providing public access to stream fisheries was the same as that used for lake fisheries. Either a trail was surveyed, platted and dedicated, or a small tract of land was requested/acquired. The anglers using the site, through the years, were finally compressed and restricted to the very short stretch of stream contained within the site.

This has created (1) high concentrations of anglers on the few fishable pools that may exist within the public use-site portion of any given stream, (2) reduction of important recreation factors and esthetic values, (3) over-utilization of the available stream fishery, (4) trespass problems with many homestead, summer cabin, and headquarter land entrymen, and (5) has created large segments of "exclusive Fisheries".

To insure minimum public access and taking into consideration the nature of the fishery and the extent of present angler-use, existing site acquisition methods would isolate large areas of land from natural private enjoyment, progressive use and ownership. This appears neither desirable nor necessary.

- (3) Proposed Solution to Public Access on Stream Fisheries: That a 5-10 foot strip, paralleling both banks of stream be classified as a public access right-of-way. Additional trails (R.O.W.) could be established intermittently along the stream course linking the closest road to the stream R.O.W. Strip. A possible "legal" definition of this stream R.O.W. strip may be:

".....right-of-way strip extending from ordinary stream high water mark (not flood mark) to a point 10 feet landward, and as the high-water mark does shift, going landward with erosion and waterward with accretion, so shifts the landward R.O.W. boundary".

Establishment of such bank R.O.W.'s are to be made on stream fisheries of high potential only.

Such strips would provide continual access to the fishery for both the resident land owners and the visiting angler-recreationist....."

Below are listed those streams containing known high-value sport fisheries that were recommended for inclusion under the stream bank public right-of-way proposal. These waters, in part or whole, cross or will pass through State lands (shaded streams on enclosed maps indicate listing under this proposal).

Dedication of Historically Used Public Trails to Sport Fisheries:

Court cases and provision of 48 USC 23, 74.32 and 244 will prepare the way for an appeal. Adjudication on land entries are being made in order to perpetuate the right of the public to the use of four access trails leading from the highway, traversing entered lands, and terminating on a valuable high-use stream fishery.

TABLE 8

<u>Site &amp; Map No.</u>	<u>Fishery</u>	<u>Location</u>	<u>R.O.W. Length</u>	<u>R.O.W. Width</u>
95-1	Willow Creek	Mile Post 6: Willow Hwy.	1160'	30'
96-1	Willow Creek	Mile Post 7: Willow Hwy.	1450'	30'
97-1	Willow Creek	Mile Post 9.1: Willow Hwy.	1015'	30'
98-1	Willow Creek & Peters Creek	Mile Post 15.4: Willow Hwy.	6284'	30'

Under the above provisions, entrymen must indicate such rights-of-way on homestead applications and should the trails be public rights-of-way, the patent is to express such reservation.

The problem appears to center around whether or not a settler has furnished full information as to existing rights-of-way (trails) within his land entry and whether these exist, historically, as public ways in common use.

Although such public ways were not administratively processed by the governing agency under existing legislation at a previous date, the fact that they were and still are used by the public constitutes dedication, and therefore patent must note such routes.

Acknowledgements:

The following personnel and agencies contributed material assistance to this project segment:

1. Fishery Biologists, Division of Sport Fisheries, this Department, throughout the State.
2. Alaska Division of Lands, Department of Natural Resources.
3. The Anchorage Lands Office, Bureau of Land Management, Department of the Interior.
4. Conservation Officers, Division of Protection, this Department, throughout the State.
5. The Izaak Walton Club (Anchorage), Matanuska Valley Sportsmen (Palmer), and the Tanana Valley Sportsmen (Fairbanks).
