Juneau, AK 99811-0001

Re: ADF&G Commissioner Appointment

Governor Bill Walker:

I would like to take this opportunity to recommend Roland Maw for Commissioner of the Alaska Department of Fish & Game. Roland's education and experience has given him the extensive knowledge needed to manage the natural resources of Alaska with sound biology and science. His background in forestry and wildlife management make him a sensible candidate for the Commissioner position.

Roland has proven leadership skills and a sense of fairness and equality for all users; he will listen with an open mind. He will make science and abundance-based management a priority.

Roland is well respected by fishermen and hunters alike and has demonstrated a practical style of communicating well with all user groups.

Please consider Roland Maw for Commissioner as an appointment that would benefit the State of Alaska and all of its users.

Thank you,

Fred Martushev
