OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chum Salmon	7/28/1987	x			<input checked="" type="checkbox"/>
Pink Salmon	7/28/1987	x			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

On July 28, 1987 an aerial survey (helicopter) of Canyon Creek was conducted. One hundred fourteen live chum salmon and one chum carcass and 850 pink salmon were counted in the lower 13 miles of stream. The coordinates shown on the map (N 65.06 deg; W 166.06; NAD 83) indicate the upper limits of chum and pink salmon spawning.

Since GPS technology was not available at the time of this survey (1987) the coordinates were estimated off the original topographical map used during the survey.

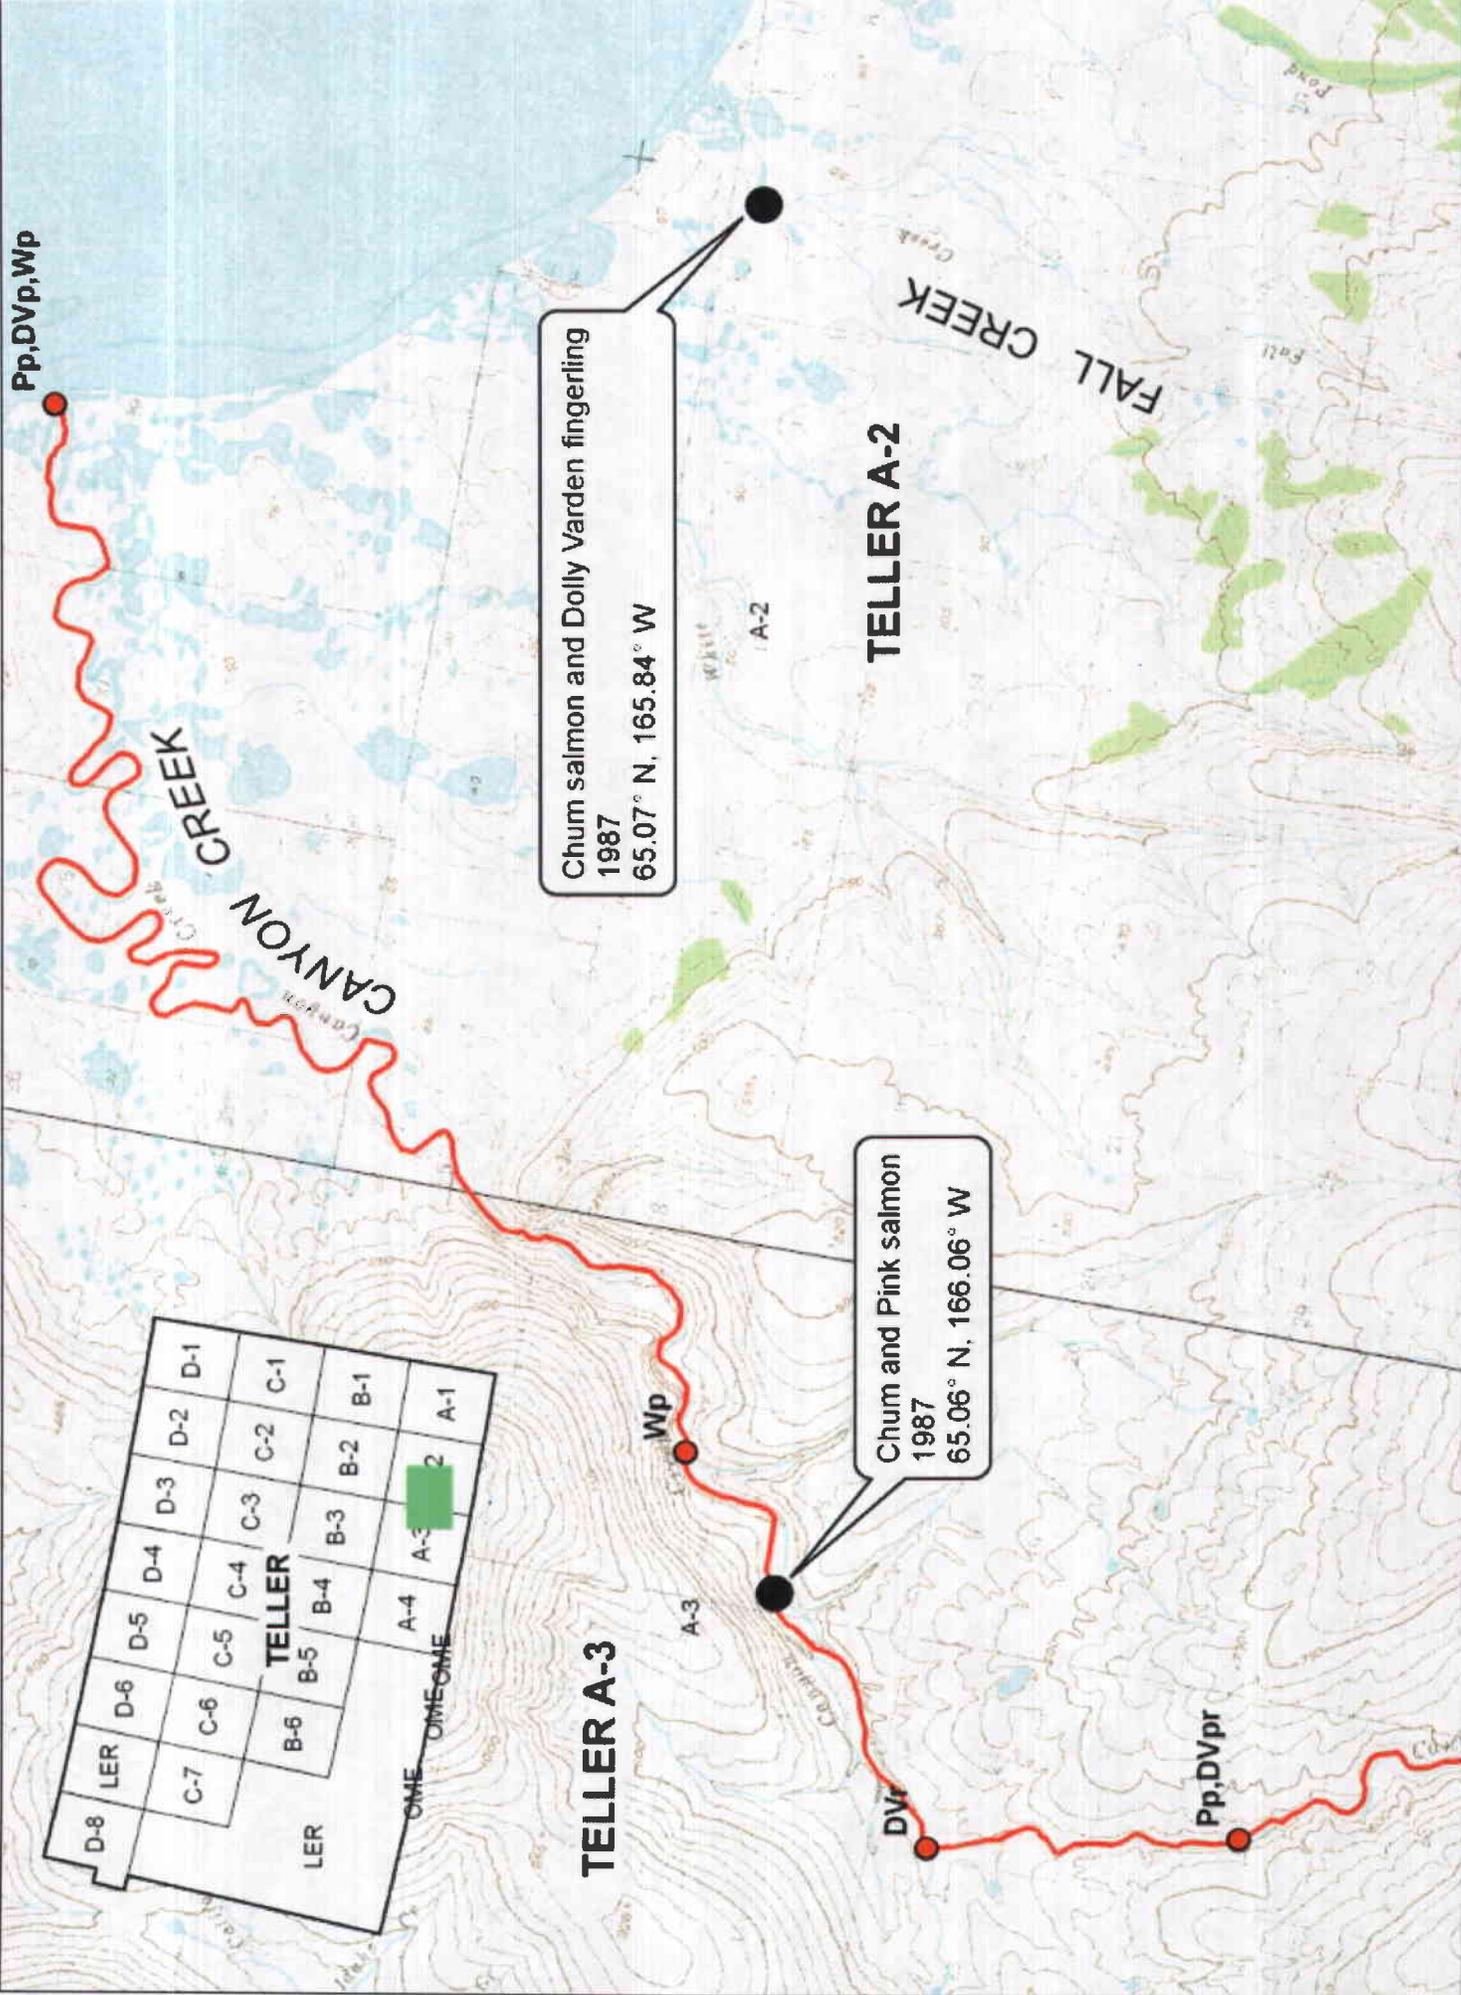

Observations made in 1987

Name of Observer (please print): Carl F. Kretsinger
 Signature: _____
 Agency: Bureau of Land Management
 Address: 1150 University Ave.
Fairbanks, AK 99709

ALASKA DEPT. OF
FISH & GAME
Date: 9/28/2006
OCT 2 2006

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.
