OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chum Salmon	August 20 - September 24	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled, copies of field notes, etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 In 2007 thirteen chum salmon were radio tagged on the Colville River between August 21 and August 30. Fish were relocated via fixed wing aircraft between the time of tagging and September 24. Upstream-most extent was observed during early September, with visible redds identified on September 1 and 2 within the area submitted for designation (see map). The downstream boundary of this spawning area is N69.061 W155.074 and the upstream boundary is N68.985 W155.514.
68.985
same is 07-880
