					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Anadromous Dolly Varden have been observed spawning in this stream during numerous aerial surveys in the late 1980's and early 1990's. It is not included in our survey index areas and counts have never been made, but they were there each time we looked.
