Species	Date(s) Observed	Spawning	Rearing	Migration
CHINOOK SALMON	7-30-89	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Present catalog shows the upper limit for chinook salmon spawning in the Middle Fork Chena River to approximately 2-2.5 miles upstream of confluence of Munson Cr. Above observations extends the range of Chinook salmon (=spawning) in this stream to approximately 2 River miles upstream of confluence of Otertail Cr; an additional distance of 5-6 River miles. See attached map and survey form.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
