OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon	9/22/01	4			<input checked="" type="checkbox"/>
Coho Salmon	7/3/01		50		<input checked="" type="checkbox"/>
Coho Salmon	7/14/01		36		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:  
Adults For 9/22/01 were observed while flying aerial surveys.  
Juveniles were captured with minnow seines.  
All Fish, both Adults and Juveniles, were observed within 2 miles of Takotna/Moore Creek confluence.
