					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** On September 5, 2003 DCF (Fairbanks) contracted salmon survey pilot (Dennis Miller piloting a PA-18) was conducting other work in the Denali area when he observed 5 Coho salmon in an unnamed spring-fed stream south of Chilchukabena Lake at GPS (WGS 84) coordinates 63-49.40N 151-27.64W.

**Subject:** Denali area coho salmon observation

On September 5, 2003, I saw 5 coho salmon in a spring-fed stream south of Chilchukabena Lake, at 63-49.40, 151-27.64. I don't think I've ever seen any coho here before, but I haven't looked many times either. This is the same area where I saw some king salmon earlier in the summer.
