OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chinook Salmon	1-Aug-06	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

ADF&G was conducting aerial surveys and located Chinook salmon spawning on redds at this location from the confluence with the Kantishna River upstream to the forks. Add Chinook salmon spawning to 334-40-11000-2490-3140-4137 to 151.399931 ° W, 63.854288 N.

**Subject:** New Noms

*07 borba - Kantishna - 01*

I sent the forms out to Eiler (Juneau) and Driscoll (Anchorage) for signatures, Boeck and Brown are in Fairbanks will forward them down after I get them to come by and sign.

I need a couple more maps from work conducted this Chinook salmon season. The following surveys were conducted by Kevin Clark of ADF&G -CF Anchorage if you have questions on location call him at 267-2141. I have the forms started but I need the fish distribution database number of waterway.

*at* ✓ McDonald Creek in Fairbanks found Chinook salmon on redds up to the springs. Location came in as 64 degrees 33.333' N and 149 degrees 19.000' W. *334-40-1100-2490-3290-4020-5010* *SW Mean*

Two areas on Kantishna documented on the previous table referring to fish 03-657. The locations were recorded as 63 degrees 52.012' N and 151 degrees 27.000' W and neighboring stream of 63 degrees 50.109' N and 151 degrees 28.959' W.

*MT McKinley D-3 334-40-11000-2490-*

Also what USGS Quads and fish distribution database number of waterway do you want me to put on the Koyukuk River mainstem for coho salmon presence up to the community of Allakaket? I will provide back up from surveys on this one for harvest but the spawning areas have only been identified by locals and have never been verified by a biologist. *3140-4141-*

*334-40-11000-2125*

This will get me started on the last ones for this submission period. Thanks BB

*Bettes 6-6*

**Subject:** RE: noms

I'll double check the nominations forms you send w/signatures vs my copies and contact you if I find something that doesn't match or requires more brain power to figure out.

**To:** j\_johnson@fishgame.state.ak.us  
**Subject:** RE: noms

I remember tracking down the citations but was not sure if it was time for a print. Some have to go to Juneau so I will send them down and have them sent directly back to you. Others are from Biologists here in Fairbanks.

I will send you the Koyukuk one for review as I am not sure what water body number you want for the mainstem and maps listings etc...

BB

9/5/2006

Looked thru my email and thought message sent 06/06/06 had us good to go.  
Were there issues after that I'm failing to recall?

Bonnie

I've gone thru your noms and all looks real good to me, gold star for you.  
I checked on East Fork Chena River and found that name on an older version of the Big Delta USGS map (1966). I sent a query off to my contact w/USGS.  
Could you provide copies of these citations listed on several of the noms. Hard or pdf copies are fine, Eiler et al, 2004, Eiler et al, 2006, Eiler et al, in prep.  
Your help has been greatly appreciated  
thx

We can get the signatures but I thought you had to review the changes that I made one more time. Let me know if I should send them out to the appropriate persons for signatures from the copies I have. BB

Bonnie

The sooner that happens the better, although your endorsement is more than enough especially if getting signatures is a hassle and keeps us from making that 29 Sept deadline. It is good to at least have the name of the observer in case someone has questions regarding the nomination.

**Subject:** Anadromous Waters Catalog and Atlas nominations - delete if not interested

Dear Colleagues:

My apologies for the shotgun approach but given the importance of the subject I feel this method is justified.

The Alaska Department of Fish and Game (ADF&G) will begin accepting nominations for revisions to the Fish Distribution Database September 1, 2006. Data from the FDD is used to update anadromous fish distribution information in the *Catalog of Waters Important to the Spawning, Rearing or Migration of Anadromous Fishes* and its associated atlas *An Atlas to the Catalog of Waters Important to the Spawning, Rearing or Migration of Anadromous Fishes* known collectively as the Atlas and Catalog.
