Subject: AWC Atlas Map mistake - Arctic / Interior Region

J

Per our conversation, the apparent mistake I found is on the Norton Bay D-1 quad, stream # 333-40-107-2878. The stream is in the Arctic region and had appeared on the older 4/25/05 map which showed the streams in both regions. However, the new map, 3/24/06, only shows the Interior Region streams not this single stream on the Arctic side of the line. I checked the Catalog and database and it still appears in the Catalog and IMS data. The Norton Bay map I have for the Arctic Region shows the same thing no stream. Once you figure out what the problem is a note should also go out to the area Habitat and other bios letting them know that the stream is still catalog but that it doesn't appear on the map.
