OHW 28.0 Stream Stage: Medium
Wetted 28.0 Dominant Substrate: Sand/Silt/Clay

Rosgen Channel Type:

Station Comments: A large spring, 28 m wetted width at origin. Below the springs it develops into a stream with a wetted width of 30-50 meters. Too large to wade and e-fish effectively, but would be a good cataraft site. The bottom consisted of soft mud and was too deep to perform a stream discharge.
