OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	10/7/2009	3			<input checked="" type="checkbox"/>
Coho	10/10/2009	2			<input checked="" type="checkbox"/>
Coho	10/5/2010			2	<input checked="" type="checkbox"/>
Chum	10/5/2010			1	<input checked="" type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: (see attached map for location of observations)

Add coho spawning / present to stream

2009:

Observation (10-7-2009): Three coho salmon (*Oncorhynchus kisutch*) were observed spawning in Caribou Cr. at N 66° 08.690' W 155° 47.147' (approximately 150 m upstream of the road crossing that leads to Hog Landing). The fish were observed while on a trip to retrieve one of our long-term water quality recorders.

Observation (10-10-2009): Two coho salmon spawning at N 66° 09.889'; W 155° 31.561'; approximately 100 m downstream of the confluence of Caribou and Wallick Creek. Fish were observed while conducting stream flow and gauging station maintenance.

2010 Observation: Two mature coho salmon and one mature chum (*O. keta*) were observed at 66° 10.497'; W 155° 28.911'. The chum salmon was a fall-run fish in fresh condition. The fish were not observed spawning but moving up to spawning areas higher in the drainage.

Name of Observer (please print): Carl Kretsinger

Signature: _____ Date: 12/1/2010

Agency: Bureau of Land Management

Address: 1150 University Ave.
Fairbanks, AK 99709

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.

J,
attached are two new nominations for Clear and Caribou Creek in the Hogatza River drainage. Be sure to scroll to the lower left corner of the .JPG map (upper Caribou Cr.) to see upper most coho observations. Give a shout if questions. Thanks! -c
