OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chinook Salmon	8/9/2010		2		☐
					☐
					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc. Add new stream w/ Chinook Salmon Rearing

Comments: See data sheet & map. Photos included.
Chinook all captured with minnow traps (all age-0 juveniles)
Other species captured on data sheet.
Habitat extends beyond upstream sampling location (see map)
All sampling conducted in tributary stream above any Yukon R. influence
Fry rearing from tributary mouth upstream to uppermost capture site (map & data sheet coordinates)
ALL SALMON FRY genetically screened to species.

Name of Observer (please print): DAVID W DAUM
