ref no#s 15-533, 15-103, -104, -106, -107, -130 (ref 3171-4350)

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments 97 AWC Additions and 9 AWC Extensions Summer Chum Salmon Spawning

Locations of 106 summer chum salmon determined to be spawning in tributaries of the Yukon and Koyukuk River drainages during the 2014 Yukon River Summer Chum Telemetry project. Locations obtained using aerial surveys of radio tagged salmon conducted from 6/25/2014 through 9/04/2014 . Adult summer chum salmon were captured and radio tagged near the village of Russian Mission and tracked to their final spawning destinations using remote tracking tower installations and aerial surveys conducted by ADF&G and USFWS. The attached map shows final spawning locations of summer chum in 2014 (red dots indicate AWC addition/extension locations). Spreadsheet contains fish locations for 106 addition/extension records (WGS84 Decimal Degrees).

Add newstream w/ Chum salmon spawning

Name of Observer (please print): Richard Driscoll
