In response to item #1 of your memo dtd 10/30/84:

I've indicated on your attached map the upper limit of chum spawning in E. FK. Henshaw Ck (Red)

In response to item #2:

I've attached a map showing location of King Salmon catches in the Chandalar R. near Venetie.

Dear Mr. Frank:

We received and appreciate your return of the subsistence fishery survey form. Thank you for your remarks on the presence of king salmon in the Chandalar River last year. Such information is very helpful to us. I would appreciate it if you could provide me with the approximate date(s) and location of the 8 king salmon you captured this past season. I have enclosed a postage-paid envelope for your convenience.

Thank you again for your help.

Sincerely,

Louis H. Barton

Greetings

all the king salmon catches occurred in the last 2 weeks of August. We had our nets set about 2 miles down river. Several other people caught kings too but I do not know how many. The cause for kings up here could have been the high water during that time.

Habitat - Region III

Comments:

Some King Salmon came up the
Chandalar this year. We never caught
any before. Must have been the high
water. Several other people caught some
too.
